Dear Mr. Burton:

I met with the Board of Commissioners of Emery County at their regular meeting on May 6, 1957 in regards to their secondary road program and I would recommend that if Emery County has secondary funds available, or to be allocated to them in the year 1957-1958 that serious consideration be given to their proposal to improve the roads outlined in the accompanying letter.

State Road Commission of Utah
Erin Leonard, District Engineer
Price, Utah

Dear Sir:

We respectfully request matching funds on two of Emery County's secondary roads. We propose to grade, gravel, and oil on county road number 333 from it's junction with 332 to it's junction with county road number 340 from Elmo East, a distance of 1 ½ miles. We estimate this project to cost approximately \$10,000 per mile.

Then on county road number 336 from Ferron, Utah, east to Molen, Utah, for a distance of 3 miles, which we estimate will cost \$6,000 per mile, or a total of \$68,000 plus ten per cent for engineering.

These roads are school bus routes and serve the inner community traffic, and are very hard to maintain both in winter and summer.

These are our number one projects for the year 1957-1958.

Sincerely yours,

EMERY COUNTY BOARD OF COMMISSIONERS

September 3, 1957

Minutes of a regular meeting of the Emery County Board of Commissioners, held in the Courthouse at Castle Dale, Utah, at 10 o'clock A.M. All Commission members being present also Attorney, Mack V. Bunderson, and Clerk, David N. Jewkes.

REED LARSEN:

Mr. Reed Larsen of Emery, appeared regarding the purchase from the County of the underground rights of a certain parcel of real estate near Emery, Utah, Mr. Larsen having title to the surface rights on said property. Mr. Larsen was advised by Attorney, Bunderson, not to purchase said underground rights because he doubted any title given by the County would be valid.

LAWRENCE DELEGATION:

A delegation of citizens from Lawrence, Utah, appeared regarding the condition of the school bus road in their vicinity and also complained of the condition of two bridges on said road, which had been more or less weakened by recent flash floods. The delegation stated emphatically that they would not allow their children to ride the school bus over said bridges and would transport all students to and from school in their own vehicles rather than have them ride across the weakened bridges in the heavy bus. Commission Chairman, Milton McElprang, told the delegation that he and the road Superintendent, Harold Sorensen, had examined the bridges in question and in their opinion the bridges, though somewhat weakened, were not dangerous for school bus crossing, also that the heavy County road patrol had crossed both bridges and that if said bridges would carry the patrol it certainly would also carry the lighter bus. Mr. McElprang also explained the many problems of the road department caused by the recent floods, the impossibility of getting at all the needed replacements and repairs at once, and also the difficulty of obtaining needed materials and the necessary laborers to make replacements and repairs. The Commissioners promised that the road, and bridges, would be fixed as soon as possible but would not state any definite time as to when, because of the problems mentioned above.

Humphrey of Orangeville, appeared regarding the problem of getting to and from the Television Towers on the Horn Mountain, West of Orangeville, said towers serving the towns of Orangeville, Castle Dale, Ferron, Huntington and Cleveland, with Television programs. Mr. Humphrey is concerned with the problem of getting to and from said towers during the winter months, if and when heavy snows come and asks the Commission if it would be feasible or possible to install some sort of a lift a the foot of Horn Mountain immediately East of said towers, for access to and from said towers. The distance by road is approximately 25 miles, some portions of which would be almost impassable in heavy snow, whereas, there is a good road to the foot of the mountain east of the towers, and some sort of lift or hoist from this point to the towers would simplify any necessary travel to and from said towers. No answer was made by the Commissioners to Mr. Humphrey's proposal or question.

PARAMOUNT COAL COMPANY:

After reading letters from the Utah State Tax Commission, and Therald N. Jensen, Attorney of Price, Utah, regarding the assessment on certain personal property in the years 1956 and 1957, assessed to the Paramount Coal Company of Huntington, Utah, in said years. Said reductions being for the year 1956 and in the amount of \$1,800.00 assessed valuation and for 1957 in the amount of \$1,600.00 assessed valuation. County Treasurer, Frank Moffitt, was instructed to refund to said Company any tax applicable to the 1956 assessment, and Clerk-Auditor, Jewkes, was requested to enter the assessment reduction in Book-A of the 1957 tax rolls. The letters mentioned above can be found in Book "A" on page 68 of 1956 Mines and Utilities Tax Assessments:

November, 1957

Utah State Road Commission
Salt Lake City, Utah

Gentlemen:

We, the Emery County Board of Commissioners, respectfully request that something be done to correct the present dangerous condition at the intersection of Utah State Highways U-10 and U-29, North and East of Castle Dale, Utah. You are probably aware of the fact that passenger vehicle and pick-up trucks traveling North on Highway U-29 are required to stop at the above mentioned intersection and after coming to a stop have absolutely no view of any vehicles traveling South on Highway U-10, because of a high ridge on the left side of the intersection, and anyone emerging from U-29 to the proper lane on U-10 are taking chances because of this condition. Also many heavily loaded coal trucks travel on U-29 and although they can see the traffic on highway U-10 better than passenger cars, because of higher driving cabs, they also are taking chances when moving from U-29 to the proper lane on U-10 because of the slowness in maneuvering their heavily loaded vehicles across the lane of oncoming traffic on U-10.

Several near accidents have taken place at this intersection recently and many users of the road have complained to us and we respectfully request that you do something in the very near future to correct the situation. Some necessary action on your part may be the means of avoiding a tragic accident.

Hoping sincerely that you will consider this request seriously and take some action soon, we are very truly yours,

EMERY COUNTY COMMISSIONERS

Minutes of a Special Meeting of the Emery County Commission, held in the Courthouse at Castle Dale, Utah, at 10 o'clock A.M. All members being present, also Attorney, Mack V. Bunderson and Clerk, David N. Jewkes.

RECREATION PROGRAM:

Several persons, representing most of the Communities of Emery County, appeared and requested the Commissioners to budget sufficient funds to cover the cost of financing the maintenance of a county wide Television program and that all such funds budgeted for recreation purposes be applied for the above named purpose. The commissioners agreed that in their opinion the financing of the maintenance of a county wide television program would be the most feasible part of the recreation for the county to participate in and requested that an estimate of the required amount needed to finance the maintenance of said television program, be submitted to them, so they could budget funds for that purpose and later set a tax levy to raise the amount needed.

It was suggested by Arthur Petty of Emery, Utah, that those persons appointed to act as the County Recreation Committee in August 5, 1956, continue acting for one more year, after which a new committee be appointed by the Commission. The Commissioners unanimously approved Mr. Petty's suggestion. The member of the above mentioned committeemen being as follows: William Justesen, Orangeville; LaMar Wilber, Castle Dale; Phillip Nelson, Ferron; J.L. Larsen, Huntington; Arthur Petty, Emery; and School Board members Jack McKay of Greenriver and Ray McCandless of Huntington. Duane Jensen of Cleveland, who was also appointed at the same time as the above named persons, to be replaced by someone from Cleveland-Elmo District, because of his refusal to act.

MELROSE LUKE:

Mr. Melrose Luke, Insurance Agent of Orangeville, appeared and informed the Commission, that in his opinion the insurance policies now in effect on the Courthouse and on the furniture and fixtures therein, were inadequate to cover possible replacements and requested approval to write up additional policies. Mr. Luke was informed that the Commissioners would budget necessary funds to cover additional insurance and that if after investigating the policies now in effect, are in the opinion of the Commissioners, not sufficient, Mr. Luke's request will be granted.

HOMER DUNCAN:

Mr. Homer Duncan, of Ferron, appeared and requested the permission of the Commission to install a cattle guard on the Clawson Paradise County Road East of Clawson. Mr. Duncan's proposal being that the County take 1/3 of the expense, he and Victor Price of Clawson, the other two thirds. Mr. Duncan was told that due to the frozen condition of the soil at this time of year, it would be hard to install said cattle guard, but that the Commission would approve installing the same as soon as the weather permitted. Mr. Duncan informed the Commission that at the present time he is using a gate at the point where the cattle guard will be installed. He was informed by the Commission that according to law it is not permissible to fence off a County Road and that the County would not assume any responsibility concerning the gate or fence.

MR. SHINER & OLSEN:

Mr. Shiner and Mr. Olsen, representatives of Conoco Company, met with the Commissioners regarding a possible contract to furnish the County with gasoline, diesel fuel, oil and grease for County road equipment. Mr. Larsen was informed that the Commissioners would like to confer with other counties who have such rest homes, in order to determine whether or not such a project would be feasible for Emery County to attempt at this time, before giving an answer to his proposal.

ERROL LITSTER:

Mr. Errol Litster, the products distributor for Utah Oil Company, who at the present time has a contract with the County for furnishing gas and oil and other necessary items for county road use, appeared and informed the Commissioners that his company would supply said products to the county at the prices quoted to them by the representatives of the Conoco Company, previously mentioned in these minutes. ATTEST:

Clerk.

CHAIRMAN:

Castle Dale, Utah
January 6, 1958

Minutes of a regular meeting of the Board of Emery County Commissioners, held in the Courthouse at Castle Dale, Utah, at 10 o'clock A.M. All Commission members being present, also, Attorney, Mack V. Bunderson and Clerk, David N. Jewkes.

RAY B. HUMPHREY:

Mr. Humphrey, the County Weed Control Supervisor, appeared regarding weed problems of the County, including a trip to Green River to determine whether or not a certain plot of weed infested land is to be included in the new weed eradication program.

ALVIN YOUNG:

Mr. Alvin Young, of Huntington, called on the Commission, regarding the building of a ditch to prevent flood water from flooding some of his farm land, said ditch having been built years ago by the County near a stretch of County road, the right of way of said road being given to the County by Mr. Young's father, Commissioner McElprang, stated that said road had since been taken over by the State Road Commission and felt that it would be their responsibility to take care of the ditch. It was agreed by all concerned that State Road officials would be contacted and that the County would help re-build the ditch if necessary.

GREEN RIVER ENGINEER:

The acting Engineer for Green River City, called regarding the determination of the proper location of the east boundary line of Green River City. County Attorney, Mack V. Bunderson, explained to the engineer, that the Green River itself is the dividing line separating Emery and Grand Counties, and due to the fact that said river had changed its course considerably since the line was established it was Mr. Bunderson's opinion that a ruling by the Attorney General would have to be made as to whether the present course of the Green River is the dividing line between the two counties or the former course, which was the line formerly established. In Mr. Bunderson's opinion Green River City would have no legal right to extend its eastern boundary line until this question is settled.

RECREATION COMMITTEE:

Members of the County Recreation Committee appeared regarding the possibility of all units of the recreation

program operating as one unit except Green River City, and also to determine whether or not all funds for recreation purposes be used entirely for television only or otherwise. It was the unanimous opinion of all the Commissioners, that Green River City should operate their recreation program separately from other county units, providing all bills be presented to the Commission for their approval of payment. The Commissioners also unanimously agreed that all funds raised by the county for recreation purposes be used entirely for television purposes.

MELROSE LUKE:

Mr. Melrose Luke of Orangeville, appeared again regarding the increase of the insurance policy on the Courthouse building. Mr. Luke was promised that the question would be considered and that they would give him an answer as soon as any decision was made.

LARLOS G. LARSEN:

Mr. Carlos Larsen, the county investigator of indigent cases, called and informed the Commissioners of the possibility of Emery County getting Federal aid in building a rest home. Mr. McElprang told Mr. Larsen that the Commissioners would like to investigate about rest homes in other counties in order to determine whether or not it would be feasible for Emery County to undertake such a project.

CARBON COUNTY COMMISSIONERS:

The Carbon County Commissioners, and several other persons appeared regarding the oiling of a county road, part of which is in Carbon County and part in Emery County, which is also a school bus route, accommodating several families in Emery County. In as much as approximately 2 ½ miles of said road is in Emery County, our Commissioners state that it would be impossible for them to oil said 2 ½ miles in a single year, due to limited funds and many county roads to care for. The Commissioners also promised to meet with the Carbon County Commissioners again to discuss the matter further.

On the motion of Clyde E. Conover, seconded by Lloyd Baker and the unanimous vote of all Commission members, it was approved that each County official attending the annual County Officials Convention in Salt Lake City be allowed the sum of \$70.00 each to help defray expenses, the same to be paid from the Advertising and Exhibits Fund.

Clerk, David N. Jewkes, presented the claims to the Commissioners, for their approval and signature, all were signed and approved as presented, and to be paid from the following fund: General, Poor, Hospitalization, Extension Service, Weed Control, Advertising & Exhibits, Water Conservation and Flood Control, and the Recreation, also the County Road and Class "B" Road Funds.

On the motion of Mr. Baker, seconded by Mr. Conover, and the unanimous vote of all members, the meeting was adjourned.

Minutes of previous meetings were read by the Clerk, and on the motion of Lloyd Baker, seconded by Clyde E. Conover, and the unanimous vote of all members, approved as read with one correction.

MELROSE C. LUKE:

Mr. Melrose Luke of Orangeville, appeared again regarding possible increase of the insurance on the courthouse building. Mr. Luke was told by the Commission that in their opinion the policy should be increased, but before giving him an answer they would like to consult with Attorney, Bunderson, regarding the matter.

KENNETH WILLIAMS:

Mr. Kenneth Williams, head of the Soil Conservation Service, appeared regarding a possible Flood Control Project above Green River City on the Green River, which in high water seasons, has threatened to re-enter an old channel, which if doing so would destroy valuable land, buildings and other property in the vicinity. Clerk Jewkes, was requested by the Commissioners to write a letter to Mr. Riggert, an official of the D. & R.G. Railroad company requesting said company to help outline a feasible project by furnishing the engineering services. Said request being made because the railroad company has valuable property which could be destroyed or damaged if and when flood waters enters the old channel. The letter was written and signed by all Commission members. The Commissioners also decided to contact the State Road Commission regarding the possibility of them joining in the project to protect their property in the area.

CARLOS G. LARSEN:

Mr. Carlos Larsen, the county investigator of indigent cases, appeared and requested the Commission to finance the purchase of two wheel chairs and stretchers for use at the Rest Homes now operating in the County. Mr. Harold Sorensen, the county road supervisor, appeared regarding the need of a truck for transportation of gasoline from the county road shop to working equipment on the road projects, also an oil rolling machine and the repair of the county owned trailer house. Mr. Sorensen was promised that the Commission would consider his requests and grant the same in so far as funds would permit, and as soon as possible.

FRANCE CHILDS:

Mr. France Childs, the representative of Armco Company, called regarding the possible purchase by the county of more culverts. Mr. Childs was informed that he would be considered in turn with other companies selling the same products when purchases were made.

MR. SAUNDERS:

Mr. Saunders, the representative of Newspaper Agency Corporation, appeared regarding the printing of County advertisements in the forthcoming editions of his newspapers. Mr. Saunders was told that his request would be considered and that he would be given an answer later.

RAY B. HUMPHREY:

Mr. Ray B. Humphrey, the county supervisor of the County Weed eradication program, called and informed the Commission that it was necessary that an agreement be drawn up between the county and the County A.S.C. Committee who recently tentatively agreed to join in a weed eradication program. Mr. Humphrey was informed that they would contact Attorney, Mack V. Bunderson, regarding the matter as soon as his illness permitted, and request him to write up the agreement.

STATE TAX COMMISSION:

A letter from the State Tax Commission, regarding an erroneous assessment made by said Tax Commission in Book A of Emery County Assessments on page 29, in the name of Five States Uranium Company. Said letter requesting the Commission to cancel said assessment in the amount of \$5,920 assessed valuation. The Commissioners unanimously approved the cancellation of said assessment and Clerk-Auditor, Jewkes, was requested to make the necessary entries in said book.

Mr. Jim West, District Engineer
Utah State Road Commission
Price, Utah

Dear Mr. West:

The Emery County Board of Commissioners write this letter for the purpose of requesting that something be done soon to improve State Road U-236, which at the present time is in a deplorable condition.

This road is used extensively by coal truckers hauling coal from the Emery County mines. It is also used by coal miners driving to and from work in the coal mines at Hiawatha, Carbon County.

MILTON MCELPRANG:

Mr. Milton McElprang, the Chairman of the Board of Emery County Commissioners, made known the fact that a certain parcel of estate in Emery County, was being advertised for sale in his name, at the annual May Tax Sale to be held on May 26, 1958. Mr. McElprang proffered to leave a check with the County Clerk in the amount of \$28.63 for payment on said real estate, which does not cover the cost of advertising. There being no motion to either accept or reject his offer, the matter so stands.

Clerk David N. Jewkes, presented the claims to the Board for their approval and signature. All claims were approved and signed as presented, and were to be paid from the following funds: General, Poor, Hospitalization, Extension Service, Advertising & Exhibits, Weed Control, Flood Control and Water Conservation, Recreation, County Road and Class "B" Road.

ATTESTED: GLEN P. BOTT CLERK GARDELL SNOW CHAIRMAN

Minutes of the Emery County Commissioners and Planning and Zoning Commission Meeting held in the Emery County Courthouse at Castle Dale, Utah, March 23, 1970 at 7:00 o'clock P. M.

Those present were Commissioners Gardell Snow, Glenn E. Jones and Kent Stilson; Planning Commission Members, Kenneth N. Silliman, Eldred Mortensen, Maurice Jensen, Oral E. Johansen, Clyde E. Conover; Planners I. Dale Despain and Rodney Despain; Attorney Mack V. Bunderson and Glen P. Bott, Clerk.

The meeting was called to order by Kent Stilson, Chairman of the Planning Commission. Minutes of previous meetings were considered. A correction to the minutes of the February 23, 1970 meeting was made in regards to the public hearing being continued for 30 days. That meeting entry was ordered to read that the Commissioners ordered the Zoning Resolution and Map to be referred back to the Planning Commission and their Planning Consultants for revision in accordance with the objections and suggestions brought out in the public hearing, and when completed, the Commissioners would call a new hearing.

The meeting was then opened to a discussion of the third revised Subdivision Regulations. The various items referred to the Planning Consultants for revision at the January Meeting were discussed in detail. Mr. Despain explained in some detail, with maps from other counties used for illustrative purposes, how the subdivision regulations were designed to work and what was expected to be accomplished by them. After a full discussion thereon, it was moved by Kenneth N. Silliman and seconded by Clyde E. Conover that the Planning Commission recommend to the Board of County Commissioners that they adopt and pass the March 1970 revised subdivision regulations as soon as possible. The motion was called to a vote and all Planning Commission Members voted aye.

Mr. Gardell Snow, Chairmain of the County Commission then call the Commission to order in a body to consider the subdivision regulations. The Commission having been present during the deliberations of the Planning Commission, it was moved by Glenn E. Jones and seconded by Kent Stilson that the subdivision regulations be designated as Ordinance No. 1970-1 of Emery County and that it be passed and published, and that an early effective date is necessary for the preservation of the peace, health and safety of the county and its inhabitants, and therefore that the ordinance take effect upon passage and publication. The motion was called to a vote and all three commissioners voted aye. The chairman then ordered the ordinance published in the Progress-Leader, a paper published in Emery County, and filed in the Clerk's Office.

The joint meeting of the County Commissioners and the Planning Commission was then reconvened by Mr. Kent Stilson. Mr. Stilson requested the Planning Consultants for a report on the revisions of the Zoning Resolution since the public hearing of February 23, 1970. Mr. Despain explained that he had met with the attorneys for U. S. Fuel and the Huntington Coal Corporation in Salt Lake City. He then detailed the various revisions to the Zoning Resolution that had been made as a result of this conference. Mr. Despain explained that the revisions would probably meet the approval of these mining people, with the exception of three possible areas: (1) That they would prefer to be zoned in the "outlying area"; (2) That they did not want to be subject to the permit requirements for buildings; and (3) That they not be permitted to build out to the property line on land fronting on public roads. After lengthy discussion of the March 1970 revised zoning resolution, it was decided that the Planning Consultants should draft and insert on the Zoning Map a specific description for the area at Eagle Canyon that would be zoned for a highway service area. It was then moved by Oral E. Glen Hatch raised a question on the difference in width requirements as set forth in Section 8-3-4 and those in Section 8-6-4. Mr. Despain explained that these sections deal with two different zones, and the larger width requirements in 8-3-4 was designed to discourage community type housing developments in the A-1 zone. Mr. Hatch also suggested that the 1 acre requirement in Section 8-6-3 is excessive, and might cause hardship in the case of housing at mining camps.

James Potter raised a question on why the terms of the Planning Commission were different than the terms of County Commissioners. It was explained that this is required by statute.

Loren Welker of the Bureau of Land Management commented briefly on the anticipated problems along I-70, but stated that their department had no specific recommendations at this time, but probably would have after a task force committee on public lands completed its work. No further comments or protests were made from the floor.

Rodney Despain, County Planning Consultant, drew attention to two recommended changes of a strictly clerical nature. Glen Jones, County Commissioner, then moved that the Zoning Resolution on file (June, 1970 draft) as amended by the two clerical corrections recommended by Mr. Despain, be adopted by the County Commission, to be effective 16 days after its adoption and publication. The motion was seconded by Commissioner Kent Stilson and passed by a yes vote of all three County Commissioners.

There being no further comments or protests, the meeting was adjourned by the Commissioner Chairman.

Those present were Commissioners Gardell Snow, Glenn E. Jones and Kent Stilson, Attorney Mack V. Bunderson, Forest Service Supervisor George F. McLaughlin, Ranger Ira Hatch and Clerk Glen P. Bott.

Those present were then informed that the redistricting of Forest Service Units had been planned and the following recommendations submitted for approval. The present Ferron District and the Castle Dale District will be combined eliminating the Castle Dale Station. The Emery Unit is to be included with the Ferron District. The area North of the Scad Valley Divide and East of the Skyline Drive will be the Price District. The West side of the Mountain and East to the Skyline Drive will be the Ephraim District. This plan would cut the Forest Service Districts in the area from five to three districts. The Emery County Board of Commissioners strongly objected to the above proposed plan. Commissioner Snow made request for a meeting date for the purpose of informing the public of the Forest Service District Changes. Said Meeting was set for Thursday, June 22, 1972 at 8:00 o'clock in the Court Room of the Emery County Courthouse.

EXHIBIT I
TO MEMORANDUM OF AGREEMENT
BETWEEN EMERY COUNTY, UTAH, AND
UTAH POWER & LIGHT COMPANY
PROJECT

1. AIRPOLLUTION CONTROL FACILITIES

(a) Precipitator and Ash Handling System

The air pollution control facilities include a cold side electrostatic precipitator

with a guaranteed particulate removal efficiency of 99.5%. The flue gas stream will be split and diverted into two parallel sections, each of which will be equipped with seven electrical fields and 56 bus sections.

The ash handling system contains a hydraulic system to transport heavy ash, and a pneumatic system to transport lighter fly ash, together with an appurtenant ash storage area and water impoundment facility. The wet ash will be discharged to dewatering bins and the fly ash will be stored in an ash silo. From the dewatering bins and the ash silo the ash will be transported to the ash storage area in a wet condition to be covered with soil. Any water drained from the area will be impounded to prevent discharges into natural streams.

(b) NOx CONTROL

NOx emission control equipment consists of the addition of four overfire air ports which will be located in the upper portion of the wind boxes with pneumatic operated dampers to control the admission of overfire air to the furnace, thereby reducing the formation of NOx.

(c) SO₂ Removal System

The SO₂ removal system will consist of an absorption scrubber unit and ancillary equipment, and is expected to operate as follows:

The flue gas stream containing SO₂ will be cleaned of particulates in the electrostatic precipitator prior to entering a scrubber system. Induced draft fans, not a part of the Project, will remain in their present location and the discharge from these fans will be directed to a quencher to reduce the temperature of the gas prior to entering the absorption scrubber. The scrubber will contain two scrubbing levels at which an alkali liquor will be sprayed into the gas stream. It is at this point where the reaction takes place to remove the SO₂. The gas on leaving the scrubber will then pass through a mist eliminator section where a large portion of the moisture will be removed. Following the mist eliminator a reheater will be employed to raise the temperature of the gas and dry it prior to the gas entering the booster fan and thence to the stack.

On the liquid side of the scrubber system, water first is mixed with lime or limestone in a mixing tank. The slurry is then pumped to the scrubber. After reacting with the gases, the slurry collects in a sump under the scrubber. Part of this slurry is pumped to the quencher and the balance flows to the reaction tanks. From the reaction tanks the flow is then to a thickener where the sludge is removed and the clear liquid transferred to a reactor clarifier. Sludge from the thickener will probably be transferred to a vacuum filter for further removal of the water and discharge of the relatively dry cake to a dry product removal system.

(d) Cooling Tower

The tower will be an induced draft cross-flow type with twelve cells. It will be designed and guaranteed to cool 180,000 gpm of water.

(e) Stack

The stack is concrete with a brick liner. It is 600 feet high, fifty-six feet outside diameter at the base and twenty-four feet inside diameter at the top.

II. WATER POLLUTION CONTROL FACILITIES,

(a) Sewage Treatment Plant

The water pollution control equipment will include a sewage treatment plant capable of processing 10,600 gallons per day of sewage waste through an aeration-clarification-chlorination process. Liquid effluent will be stored in an isolated pond until evaporated, thereby preventing seepage or overflow.

(b) Waste Water System

The waste water system will consist of holding and evaporation basins to prevent discharges of water from various Station operations to adjacent natural streams. The system will consist of a holding basin, formed by an earth fill dike, which will collect reusable water from the various drains associated with the Station. The reusable water will be pumped back to the cooling tower basin and the ash water storage tank or will remain in the holding basin. Non-reclaimable waste water will be collected in a 10,000 cubic foot waste disposal basin from which it will be pumped to a brine concentrator where a portion will be reclaimed and the balance routed to an evaporation pond, thereby preventing discharges to any natural stream.

They promised if they were given the lease that it would be developed and r. mined. Commission Snow questioned the amount of acres. He felt sure the amount of acres mentioned was far to high. The amount and methods of payment was discussed. Motion was made by Commissioner Stilson and seconded by Commissioner Jones that an Abstractor be hired to search out the coal interest held by Emery County. Attorney Taylor was asked to check on law to see if leases had to be put on bid. Mr. McArthur asked for a time table and he was informed by Commissioners that as soon as an abstractor was contacted and they knew what holdings Emery County had they would contact them to set up another meeting. Mr. McArthur asked if, as soon as some of the parcels of land were cleared, they could begin drilling to see what coal content there was. Motion was made by Commissioner Stilson and seconded by Commissioner Jones to let them go ahead and drill as long as the County was obligated in no way. The Commissioners stressed that if the land was leased that it would have to be mined.

DR. HERBERT

Commissioner Snow informed the rest of the Commissioners that Rual Health Service would hire Dr. Herbert to work the Clinic full time. The County would still have to provide the doctor a home and possibly a small ambulance type vehicle to be at the doctors disposal. ERIC EASLEY, JOSEPH JENSEN, DOUGLAS WRIGHT, TED LUND

These gentlemen', informed the Commission that waste water from farms in the Clawson area was collecting in below Clawson and backing up until sewage systems are not working. The problem of mosquitoes this summer was discussed. Mr. Jensen informed the Commissioners that they had a company bid on the job of putting in a drain ditch in the amount of \$3,500.00 but they could not raise the money. They asked the County if they could do the job. They were informed that since a company had bid the job it would be impossible for the County Road to go ahead. Also-some of the drain ditch would be on private property and so the County would not be able to legally spend money there. The Commissioners told the men to contact Gerald Story of the State Department of Health and Doctor Cowley, Mr. Stroy's superior to see what help they could give. Also, Commissioner Stilson told the gentlemen to contact Lester Minchey to get a piece bid.

COURTNEY BREWER

Mr. Brewer talked of Zoning Problems in Emery County. He feels the zoning ordinance is out of date and needs changes. Because of a change in Mr. Brewer's employment he would not be available to help the County and cities as in the past. Mr. Brewer discussed with the Commissioners the possibility of placing a man on a permanent basis to work on planning. He said he was contacting Carbon and Grand Counties to find what they plan to do. Reimbursement the amount of \$10,000.00 could be obtained from Housing & Urban Development. Mr. Brewer discussed office space and asked if he could go ahead and hire a secretary.

The price of \$1.50 for each loaded mile plus charges for oxygen, medical supplies, etc., was temporary set. Commissioner Snow was to check with State Office while he was in Salt Lake to see if State has standard charges. Eric Easley was told by the Commissioners to be available for ambulance runs Tuesday and Thursday of each week. He is to remain in the Courthouse at all times for a 8 hour period on these days. These items were approved on motion of Commissioner Stilson and seconded by Commissioner Glenn E. Jones.

CLASS "B" ROAD MAPS

Wallace Mears and Ronald Theobald presented road maps of Emery County. The maps were gone over, changes made and final approval given for maps to be printed.

LINDA HOFILING & LEAH JUSTESEN

These ladies informed the Commission that under a change the money received from the Federal Government to fund the Senior Citizen Program may now be sent directly to the counties. If this happens, it would be necessary for this money to be turned over to the District in order for them to remain operating as a District. Linda Hofeling requested the amount of \$1,700.00 to be used in the District Office. She was under the assumption that this amount had been budgeted because she had requested it at the time budgets were being set up.

BURROUGH CORPORATION

Mr. Clive Wade demonstrated a Computer Bookkeeping Machine. The cost of this machine being \$18,000.00. After some discussion, Commissioner Snow expressed the opinion that with the amount of increase in work in the County Offices that he felt the machine should be purchased. The motion was then made by Commissioner Stilson, seconded by Commissioner Jones the machine be purchased with Federal Revenue Sharing money. A service contract was discussed. It was the feeling of the Commission that a service agreement should be entered into.

CHARLES W. TAYLOR

Attorney Taylor requested that he be able to hire Scott Johansen to research Welfare Cases referred to the County Attorney by the State. Mr. Johansen's wages to be taken from the Special Counsel budget. The State would then reimburse the County for his wages.

LARRY BOND

Weed spraying in the Green River Area was discussed. It was the feeling of Mr. Bond that it would be less expensive to hire a man from Green River to spray weeds on the County roads in that area, than to send Ned Miles down there to do this work. Mr. Bond was authorized to contact Loren Willson and offer him \$15.00 per hour to do this work. Mr. Willson is to furnish the equipment, fuel and all things necessary with the exception of the Chemicals. The Chemicals to be furnished by Emery County.

JAMES OWENS

Upon request of the Commissioners, and after some research, Mr. Owens informed the Commission that the cost per month of land and caterpillar for a central land fill garbage system would be approximately \$400.00 per month. It was explained to Mr. Owens that mill levy is set in August and budgets are set in December. At this time the Commission would give this matter consideration. Until this time, no money was available for such a expenditure.

LAMAR GUYMON

Sheriff Guymon expressed the wish to hire another dispatcher and a full time deputy to super- II vise, schedule and generally oversee the County Ambulance. The possibility of the Manpower Program paying the wages of one of these men was to be looked into. The County would have to pay the wages of the other man. The participation of the Forest Service on payment of Deputy Max Thomas wages was explained by Sheriff Guymon. The Forest Service would reimburse the County for ten months wages, benefits and gasoline. The County would have to pay the other two months. The condition of the vehicle used by Deputy Thomas was brought to the attention of the Commission. Sheriff Guymon said a new Blazer would soon have to be purchased. The Forest Service has agreed to pay \$1,500.00 toward the purchase of such a vehicle. Sheriff Guymon told the Commission the Crystals needed for the ambulance radio that would enable them to communication with hospitals had been ordered and it could take as much as six months before they are received. Also, reported to the Commission by the Sheriff was the fact that the radio system in the sheriff's office and their department vehicles would have to be replaced at a cost of approximately \$20,000.00. The Commissioners asked Sheriff Guymon if he would defer this expenditure, if at all possible until a new budget could be set up at the beginning of the new year. The commissioners asked that Sheriff's deputies take E.M.T. Training.

Claims were approved and signed.

Meeting adjourned at 6:40 p.m.

July 2, 1975

Honorable Board of County Commissioners
Emery County Courthouse
Castle Dale, Utah
Gentlemen:

You have advised us there may be need for financial consulting services rendered from time to time to Emery County or agencies thereof for various projects that the County or agencies may propose or that may be proposed by others within or without the County, and including, but not limited to those projects related to resource development, power generation, community development or other services or facilities that the county might need or desire, and including the refunding of currently outstanding bonds when such might be accomplished to the advantage of the County.

The details and nature of the improvements contemplated, the financial consulting the might be necessary, and the extent and type of the financing of the various types of improvements, if any, are not yet determined, but you would like us to assist Emery County and its agencies in connection with the contemplated projects, and in working out appropriate financing therefore, and the marketing of any bonds that might be issued to finance the construction of any of the proposed projects.

It is anticipated that for the various projects the County or its agencies may issue bonds, including special improvement district bonds, revenue bonds, general obligation bonds, tax increment bonds, industrial revenue bonds, and refunding bonds, or other types of bonds or financing that might be appropriate to the financing of all or a portion of the costs of the construction of the various projects.

We offer to assist you in a financial advisory capacity by utilizing and making available to you the research, statistical, and underwriting staff of our organization to such extent as may be necessary and helpful.

Our services, among others, will include the following:

- (1) We will study the existing financial structure of Emery County or any existing or proposed agencies thereof, as it affects the financing of the various types of improvements contemplated and will outline suggested courses of action to accomplish the necessary financing of each project or refunding as it develops.
- (2) We will attend meetings of the County Commission and/or public meetings or other meetings on behalf of Emery County in regard to the projects and will make available to you and others, as you might direct, reports and information that will assist you in making decisions or obtaining public support.
- (3) We will work with your County's legal counsel and recognized bond attorneys and other legal counsel that might be desirable concerning necessary legislation or legal opinions concerning bond issues sold to finance the projects. The legal and attorney fees, and any expenses incidental to the passage of needed legislation, are to be paid directly by the County.
- (4) We will prepare prospectuses setting forth financial and other information about the County or its agencies about the proposed bond issue or issues, and projects to be financed through the issuance of bonds. We will mail these prospectus to financial institutions which we think would be interested in the purchase of the bonds. This list includes banks, insurance companies, bond dealers, brokerage firms, etc.
- (5) We will advise with you in regard to market conditions and interest rate matters and as to the time we think bonds might be sold to advantage and will have representation present at the sale of all bonds that might be marketed to assist in computing the bids and making recommendations.
- (6) We will arrange for printing of bonds for your examination, approval and execution. We will supervise the necessary escrow arrangement for the delivery of the bonds to the purchasers and the receipt of funds by the County. Cost of bond printing is to be paid directly by you.
- (7) If deemed desirable, we will work with recognized rating service(s) in an attempt to obtain an advantageous rating of any bonds to be issued. The actual fees of the rating service(s) are to be paid by the County.

For our services, the County agrees to pay us, upon delivery of the bonds to the purchaser, a fee based upon the principal amount of bonds issued and sold to be mutually agreed at the time of determination of the details of the finance plan or plans and the kind or kinds of bonds to be issued for various projects. If extraordinary services or expenses are necessary to assist the County in any of the projects, any fees therefore are to be mutually agreed to prior to the performance of those services or the incurring of those expenses. We will do nothing that will incur any cost to the County without the County's prior consent and approval.

It is agreed that we may alone, or in association with others, submit an offer to purchase any bonds that may be offered by the County without violating the intent or spirit of this agreement.

This agreement is subject to cancellation by either party one year from date hereof upon furnishing written notice by registered mail to the other party hereto thirty days or more prior to the end of such one-year period. If this agreement is not so terminated then it shall continue in full force and effect from year to year. It may subsequently be terminated at the end of any yearly period if written notice of cancellation is given by registered mail to the other party. Such notice shall be given thirty days or more prior to the expiration of any yearly period.

Any cancellation hereof given pursuant to the foregoing shall render this agreement null and void with respect to any bond issue for which no legal steps have been taken toward authorization or issuance. Notwithstanding any such cancellation, this agreement shall continue with respect to any bond issues initiated prior to the effective date of such cancellation.

In the event that this agreement is not renewed or it is terminated or cancelled for any reason, we are to be paid the value of our services rendered prior to expiration, termination, or cancellation of this agreement.

It is expressly understood that this agreement does not intend and is not under any circumstances to be construed as requiring us to perform any service which constitutes the practice of law. We are employed in a financial capacity only.

Respectfully submitted,

BURROWS, SMITH AND COMPANY

RESOLUTION APPOINTING BAIL COMMISSIONER

WHEREAS, there are a large number of out-of-state sportsmen coming to Utah to hunt and fish; many violate the State wildlife laws for one of many reasons. If arrested, it becomes very inconvenient to detain or transport them to the Judge immediately, as required by law. As it is usually a considerable distance from the place of violation to the Court, this Commission, upon the recommendation of the Department of Wildlife Resources, deems it advisable to provide for certain State Conservation Officers to accept an appearance bail bond for non-resident violators of the State Wildlife Resources Code.

THEREFORE, BE IT RESOLVED, pursuant to authority of Section 17-32-1 through 17-32-4, Utah Code Annotated, 1953,, that the Chairman, by and with the consent of the other members of the Board of County Commissioners of Emery County, State of Utah, do hereby appoint Lyn Briggs, Larry Muszynski, Jack Topham, Steve Strong, and Clark Warren Utah State Conservation officers, as bail commissioners with authority to accept appearance bail in lieu of detention for violation of the Utah Wildlife Code by any person in Emery County, State of Utah, providing; however, said persons are non-residents of the State of Utah and it is not otherwise necessary to detain them.

The amount of bail required to be posted shall be in accordance with the minimum bail schedule for the particular offense, as published by the Division of Wildlife Resources under date of June 2, 1975.

For any violation not specifically enumerated on the minimum bail schedule, the bail required shall not exceed the sum of \$25.00, unless special authority is received from the Court to set a higher bail.

Before entering upon their duties as bail commissioners, the above named officers shall take and subscribe the oath of office, and post bond as provided in Section 17-32-3 of the Utah Code.

The boundaries of the proposed special service district are set forth on the map printed as a part of this notice.

The name proposed for said special service district is "Castle Valley Special Service District" and a general description of the type of service proposed to be provided within said special service district is: Facilities for providing water, sewerage, drainage and transportation (roads) services to be acquired through construction, purchase, gift, or condemnation or any combination thereof.

Pursuant to the provisions of the Utah Special Service District Act (Chapter 23 Title II, Utah Code Annotated, 1953, as amended) and of Article XIV, Section 8 of the Utah Constitution, the Castle Valley Special Service District may annually levy taxes upon all taxable property within its boundaries and may impose fees and charges to pay for all or a part of the water, sewerage, drainage and transportation (roads) services to be provided by the District. The Utah Special Service District Act provides, however, that no tax may be levied and no bonds of the special service district which are payable in whole or in part from taxes to be levied on the taxable property in the special service district shall be issued unless authorized by majority of the qualified electors of the special service district voting at an election held for that purpose as provided in the Utah Special Service District Act.

All interested parties may appear before the Board of County Commissioners at the above time and place and be heard, either in support of or in opposition to the establishment of the proposed Castle Valley Special Service District and the furnishing of water, sewerage, drainage and transportation (roads) services therein and may on or before said date protest against the establishment of the proposed Castle Valley Special Service District and the furnishing of water, sewerage, drainage and transportation (roads) services thereby, in writing filed with the County Clerk of Emery County. Any protest may be withdrawn by protestant at any time before the Board of County Commissioners establishes or abandons the special service district.

At the place and on the date and time above specified the Board of County Commissioners will give full consideration to all protests which shall have been filed and will hear and consider all interested persons desiring to be heard. The board may continue the hearing from time to time. After conclusion of the hearing, the Board of County Commissioners shall adopt a resolution either establishing the Castle Valley Special Service District or determining that the establishment of such district should be abandoned. The Board of County Commissioners may, in its discretion, reduce the boundaries of the proposed district or eliminate one or more of the types of services proposed, but the boundaries of the proposed district may not be increased, nor additional types of services added without giving of a new notice of intention and the holding of a new hearing:

If, within fifteen (15) days after the conclusion of the hearing, over .50% of the qualified voters of the territory proposed to be included within the Castle Valley Special Service District file written protests against the establishment of the proposed district or against a specified type or types of services within the proposed district with the County Clerk, the Board of County Commissioners will be required by law to, in the former instance, abandon the proposed establishment of the proposed district, and, in the latter instance, eliminate those types of services objected to from the resolution finally establishing the proposed service District.

Any person who shall, at or any time prior to the date and time above specified for the hearing, file a written protest with the County Clerk against the establishment of the Castle Valley Special Service or the furnishing of specified types of services within the proposed district and whose property has been included within the boundaries of the proposed district notwithstanding such protest, may, within thirty (30) days after the adoption of the resolution establishing the district, apply to the District Court of the Seventh Judicial District for a writ of review of the actions of the Board of County Commissioners in establishing the Castle Valley Special Service District. Under Section 11-23-11, Utah Code Annotated, 1953, the only grounds upon which a person may apply for a writ of review are that his property will not be benefited by one or more of the types of services authorized to be furnished by the district or that the proceedings taken in the establishment of the district have not been in compliance with law.

A FAILURE TO APPLY FOR SUCH WRIT OF REVIEW WITHIN THE PRESCRIBED TIME SHALL FORECLOSE ALL OWNERS OF PROPERTY WITHIN THE PROPOSED SPECIAL SERVICE DISTRICT SO ESTABLISHED FROM THE RIGHT FURTHER TO OBJECT THERETO.

Any protest signed on behalf of a corporation owning property in the proposed Castle Valley Special Service District shall be sufficient if it is signed by the president, vice president, or any duly authorized agent of the corporation. Where title to any property is held in the name of more than one person, all of the persons holding title to the property must join in the signing of the protest.

Upon the adoption of the resolution establishing the Castle Valley Special Service District, the district shall be a separate body politic and corporate and a quasi-municipal public corporation district from Emery County and each municipality in which the district is established. The Board of County Commissioners of Emery County shall supervise and control all activities of the district, except that, as provided by law, the Board of County Commissioners may delegate to an advisory board established under the Utah Special Service District Act, or to designated officers or employees (who may, but need not be, officers or employees of Emery County) the performance of any such activities and to exercise any rights, powers and authority of the district, except that, the Board of County Commissioners may not delegate the powers: (1) to levy a tax on the taxable property of the proposed district; (2) to issue bonds payable from taxes; or (3) to call or hold an election in the district for the authorization of such tax or bonds. Any delegation to an advisory board may be revoked, in whole or in part, by resolution of the Board of County Commissioners.
