Said Board of County Commissioners also certifies and further covenants with the purchasers and holders of said bonds from time to time outstanding that so long as any of said bonds remains outstanding, moneys on deposit in any fund or account in connection with said bonds, whether or not such moneys were derived from the proceeds of the sale of said bonds or from any other sources, will not be used in a manner which will cause such bonds to be "arbitrage bonds" within the meaning of Section 103(c) of the Internal Revenue Code of 1954, as amended, and any lawful regulations promulgated or proposed thereunder, including Sections 1.103-13 and 1.103-14 of the Income Tax Regulations (26 CFR Part 1), as the same presently exist, or may from time to time hereafter be amended, supplemented or revised. The Board reserves the right, however, to make any investment of such moneys permitted by state law if, when and to the extent that said Section 103(c) or regulations promulgated thereunder shall be repealed or relaxed or shall be held void by final decision of a court of competent jurisdiction, but only if any investment made by virtue of such repeal, relaxation or decision would not, in the opinion of counsel of recognized competence in such matters, result in making the interest on said bonds subject to federal income taxation.

Section 9. That all proceedings, resolutions and actions of this Board of County Commissioners and its officers, agents and employees taken in connection with the sale and issuance of the aforesaid \$5,000,000 General Obligation Bonds, Series 1977, are hereby ratified, confirmed and approved, including the publication of the notice of sale for said bonds as set out in the preamble hereof.

Item Number Five: Kay Freeman presented a contract to the Commissioners that would run for a term of three (3) years. The Commissioners reviewed the contract, and a motion was made by Rue Ware and was seconded by Glenn Jones that they accept the contract with MARC. This was passed by a unanimous vote by all three Commissioners.

Item Number six: Scott Smith will be moving into the Emery County area to be the new Administrator of the Clinic. He will assume his duties and move here approximately the first of July, 1977.

Item Number Seven: In the future the possibility of an Open House at the Clinic was discussed when all of the Doctors have arrived. However, it was not determined exactly when or the specific events that would take place on that date. These will be determined at a later meeting.

The meeting was then adjourned for the day.

EMERGENCY MEETING
Of
THE EMERY COUNTY COMMISSIONERS
June 18, 1977

Those present were Glenn E. Jones, Gardell Snow, Rue P. Ware, Charles W. Taylor and Kay Freeman. The reason for this meeting was that Dr. Foldy is scheduled to arrive ahead of time and arrangements needed to be made for his housing and his going to work approximately two to three weeks early, and the Board would not normally meet until after he had arrived.

The first item of business taken up was that Dr. Foldy would arrive on the 28th day of June and housing would be needed for him at that time. Telephone service will need to be arranged for in his residence when located.

Item number two was that the 29th day of June was tentatively set for a public meeting which would be handled by the Commissioners and Kay Freeman. Kay Freeman would schedule the outline of items that would be discussed and discuss the role of the clinic in the community.

Item Number Three: Glen Roberts is resigning from the Board, and we need a new board member. Some names were discussed, but no one was passed upon at this meeting.

Item Number Four: The item of space in the clinic was discussed. It was decided that Kay Freeman and Charles Taylor would check out prices of a building approximately 24 feet by 60 feet that could be located in back of the clinic. Kay will report back to the Commissioners on their findings before their decision is made.

Item Number Five: Kay Freeman presented a contract to the Commissioners that would run for a term of three (3) years. The Commissioners reviewed the contract, and a motion was made by Rue Ware and was seconded by Glenn Jones that they accept the contract with MARC. This was passed by a unanimous vote by all three Commissioners.

Item Number Six: Scott Smith will be moving into the Emery County area to be the new Administrator of the clinic. He will assume his duties and move here approximately the first of July, 1977.

Item Number Seven: In the future the possibility of an Open House at the clinic was discussed when all of the doctors have arrived. However, it was not determined exactly when or the specific events that would take place on that date. These will be determined at a later meeting.

The meeting was then adjourned for the day.

RESOLUTION 5-17-78-A

A. The Board of Emery County Commissioners of Emery County, State of Utah, hereby determines and resolves that the interest of the County of Emery and the Public interest will best be served by a resolution adopting the Working Draft for the Executive Order of the National Association of Counties outlined in the County Newsletter of April 24, 1978, page 5, which is as follows:

WORKING DRAFT FOR EXECUTIVE ORDER

THIS ADMINISTRATION hereby recognizes the vital and essential role which county governments play in the American federal system. In partnership with the federal government and/or the states and cities, counties play a very important role in delivering a great array of services. The nation's 3,104 county governments employ more than 1.4 million persons and administer annual budgets totaling in excess of \$60 billion.

IN RECOGNITION of these facts all federal departments, agencies, and staff of the Executive Office of the President are hereby directed as follows:

- A. FEDERAL ADVISORY COMMITTEES AND COMMISSIONS. When a group is formally designated to advise the Government of the United States with respect to any program in which there is a significant involvement by county government, every effort should be made to have qualified county officials appointed to these bodies.
- B. MEETINGS AND BRIEFINGS WITH FEDERAL OFFICIALS. When federal officials assemble groups to advise and counsel with them and the subject of that consultation concerns programs in which there is a significant county involvement, county officials shall be invited to participate in these sessions on terms of equality with other participants.
- C. EXECUTIVE ORDERS, DRAFT LEGISLATION, AND RULES AND REGULATIONS. All federal agency personnel will exercise great care when in the preparation of executive orders, draft legislation or rules and regulations there is a significant county involvement in the activities discussed, counties shall be clearly identified as being involved and not lumped under some vague phrase such as, "and other local governments" or "and communities."
- D. SPEECHES AND PRONOUNCEMENTS. In speeches, addresses and other communications with the public county governments shall be shown equal consideration with cities and states where there is significant county involvement. In these cases when the phrase "states and cities" appears, the phrase shall say, "states, cities, and counties."

When the phrase "governors and mayors" appears, the phrase shall specify "governors, mayors and county officials."

The President of the United States expects all employees of the federal establishment to follow the spirit, letter, and intent of this executive order.

- a. Sanpete County shall pay an allocation of \$15,000 and Emery County a like amount for maintenance of said Fairview-Huntington Highway.
- b. Emery County does not approve further maintenance payments on said State Highway.
- c. The State Department of Highways shall make every effort to keep said State Highway open in the winter season of 1978-1979. - d. If said State Highway is closed and remains in this condition during the winter months, Emery County expects a refunding for the full amount paid to the State Department.
- e. In the event that said State Highway is closed on certain dates, Emery County requests that a record of said dates is sent for their considerations.

HUNTINGTON CANYON ROAD

February 1, 1979

Bill Hurley, Director
Department of Transportation
Room 604, State Office Building
State Capitol
Salt Lake City, Utah 84100

Re: Huntington Canyon Road

The Emery County Commission Takes this opportunity to express its appreciation to the Department of Transportation for its efforts to keep the Huntington Canyon road open to travel during the winter. Said highway is important to Emery County, and our residents derive many benefits therefrom. While said highway is clearly a State highway, and the responsibility to keep said highway open is a State responsibility, the County Commission is disposed to manifest its good will by contributing \$15,000.00 to the State with the understanding that the State shall make every effort to keep said highway open for the 1978-79 winter season. The Commission would hope and anticipate that such a County expenditure would not be necessary in future years.

It is our further understanding that Emery County would not be requested to pay said \$15,000.00 unless and until Sanpete County has honored their concurrent commitment. Also, it is assumed I that if it were not possible to keep said highway open, that the contribution from Emery County would be promptly refunded to the County. The County would also request that the Department of Transportation provide the County with a record of the dates on which said highway was closed, and the duration of said closure, and also report to the County on the amount and type of maintenance activities actually carried on by the State.

We would further request that the Department of Transportation immediately notify the Emery County Sheriff's Office and the Utah Highway Patrol whenever said highway is closed or reopened.

The Commission again extends its appreciation for the Department of Transportation's efforts on behalf of the residents of Emery County. Your written response to the above would greatly facilitate the disbursement by Emery County of the above \$15,000.00

Roger Curtis
Chairman
Emery County Commission

The forgoing letter by Emery County to the Department of Transportation relating to the Huntington Canyon Road has not received an answer. The Emery County Commission is very much concerned that to the following items in said letter has had no response. (a) Has the payment of \$15,000.00 allocated to Sanpete County been paid. (b) Emery County has not been noticed of closure of said highway. (c) Refund of Emery County allocation has not been received. (d) A record of the dates that said highway was closed and the duration of said closure has not been given. Sanpete County employees made a lobby effort in favor of the proposition of keeping the road open upon consideration of the above items Emery County's allocation in the amount of \$15,000.00 was hand carried by Commissioner John I. Parker to Bill Hurley, Director, Department of Transportation, Room 604, State Office Building, Salt Lake City, Utah.

GREEN RIVER AIRPORT LETTER

From the City of Green River
December, 1979

GREEN RIVER AIRPORT PROBLEMS

BACKGROUND

Aviation has been active in the Green River area since the days after World War II. Several local folks owned planes and although there was no "airport" as such, the lack of government regulation and the simple needs of the aircraft of the period made nearly any dirt road a landing strip. A couple of five gallon cans filled down at the Texaco usually sufficed for fuel. Today's needs are sadly far more complex.

The first and only real airport evolved at its' present location in the mid fifties. Jim Hurst came here with the uranium boom to run the drugstore but before long was so involved with airplanes he sold the store and went into aviation full time, . . . He almost alone is responsible for the airport facility as it now exists. He built and paid for the two primary hanger buildings and the fuel system and the deeded it all to the City in exchange for a 20 year lease as airport operator. The runway was on unused private land right next to town which helped to make this one of the handiest airports in the nation. A person could, walk two blocks from the tie-down area to any down town motel or cafe. Through the years Hurst pleaded and wheedled for help to improve the airport from any source he could find. The State Highway Department and the State Aeronautics Department were the ones he picked on most. In any case, through the years at little cost to the City and with lost of volunteer help a la Tom Sawyer the airport got blacktops, lights and many other needed improvements. Records are sketchy, but its doubtful the City spent more than a couple of thousand dollars of General Fund money on the airport right up to the present time. Rebates from the State for taxes on aviation fuel sales take care of most expenses. The City and the area are quite fortunate to have had an airport of this caliber at practically no tax payer cost. Particularly since an extremely low cost facility is the only kind they could afford.

PROBLEM

The airport must be moved. Two reasons make it imperative: First, the private owners it of the runway land want to sell it and may take such action at any time. (Presently the City has no written lease agreement with the owners.) Secondly, with I-70 development the airport location is simply unsafe. We no longer meet may of the FAA regulations regarding proximity to structures, roads, etc.

Previous City administrations (mostly under ex-mayor Rey Lloyd Hatt) saw the need and started action. They obtained BLM land on a good location and proceeded to get Federal and State help for the new facility. About \$450,000 has been spent so far and what we have is: deeded ground, a first quality completed runway, taxiways, lights, electricity, fencing, beacon tower and roads within the property. This all was completed in late 1977. The City's portion of this cost has been nearly \$40,000 which is a very substantial commitment for a small community like us. This amount by the way is fully paid off.

What we lack though is substantial and the kind of improvements still needed do not qualify for FAA help. We have exhausted all avenues both State and Federal and cannot locate additional funding. The basic needs and cost estimates are as follows:

Building -- lobby, restrooms, shop hanger, office	\$80,000
Fuel Systems -- one grade gasoline plus jet	36,000
Water System -- culinary water will be hauled	2,000
Telephone -- new lines must be run	1,500
TOTAL	\$119,000

There is simply no way the City or the present airport operator, Redtail Aviation, can handle this kind of debt and it's becoming more of a real possibility that the present airport will be closed down soon. Everyone agrees that would be a severe blow to the future of the Green River area. While it cannot be honestly said the airport is absolutely vital to the continued life of the City, there is no question as to the very substantial benefit it provides -- both economic and otherwise. In these days of tight fuel allocation and restrictive government, if this airport closed it is most unlikely it could ever reopen.

SOLUTION

Our proposal is simply that Emery County take over the airport from the City of Green River in order to provide the immediate funds needed. Operating costs would be more than covered by tax rebates and other airport derived revenues so it can reasonably be forecast the only expense to the County would be that expense to finish the project. The details of such transfer are to numerous to discuss here but are all straightforward and could be worked out quickly.

We are aware of the multitude of projects the Commission is asked to sponsor and regret having to add to your burden. However, we fell this is the last option available to us. Please give our request your most careful consideration.

Mayor of City of
Green River

RESOLUTION NO. 12-5-79

RESOLUTION NO. 12-5-79 (.b)

WHEREAS, the Utah Power & Light Company has been for the past approximately ten years and is now engaged in the construction and operation of coal-fired electrical generating plants in Emery County, Utah; and

WHEREAS, such industrial activity has resulted in a substantial growth in the population of Emery County which in turn has greatly increased the demand for new and improved essential public services, and

WHEREAS, in an attempt to meet the urgent need for a number of these public services, general obligation bonds have been authorized and issued and are pending issuance in an amount exceeding \$42,000,000, and

WHEREAS, said bonds have been and it is expected will be issued by Emery County, Board of Education of Emery County School District and Castle Valley Special Service District, and

WHEREAS, the principal of an interest on said general obligation bonds are payable from taxes levied on property in Emery County and said districts, and

WHEREAS, the Utah Power & Light Company at the present time pays approximately 80% of the taxes levied on the assessed valuation of property in the county and it is estimated that within the next year, it will pay approximately 90% of such taxes, and

WHEREAS, by Order dated June 7, 1979 by the Utah Public Service Commission, the Utah Power & Light Company is required to sell or-f--ions of its Emery County Plants to entities

that are tax exempt or that may be paying taxes at a lower rate than Utah Power & Light.

WHEREAS, in the event such sales occur, there will result an impairment of the tax base in Emery County thus reducing the tax collections in the County and thereby jeopardizing the servicing of said bonds, retaining the present favorable bond ratings of the County and the two Districts and reducing their opportunities to obtain favorable bond ratings and establish a dangerous precedent for further similar sales.

BE IT RESOLVED,

1. That the Board of County Commissioners of Emery County, Utah, after careful consideration of the foregoing and after investigation and review of all circumstances pertinent to this matter, hereby finds, concludes and determines that such sales are contrary to the public interest, will interfere with the orderly operation, efficiency, economy and administration of local government in Emery County, and will retard the development of programs designed to improve the education, health, general welfare, comfort, safety, order, convenience, prosperity, opportunities and well-being of all citizens, residents and public and private institutions in Emery County.

2. That for the foregoing reasons the Board of County Commissioners hereby records its opposition to such sales and hereby authorizes its Chairman to appear at the informational hearing before the Utah Public Service Commission scheduled to be held on Friday, December 14, 1979, in Castle Dale, Utah, and represent the opposition of the Board of County Commissioners to such sales.

3. That the Chairman of the Board of County Commissioners is hereby further authorized to present a certified copy of this Resolution at said hearing before the Public Service Commission.

HELD IN THE
EMERY COUNTY HIGH SCHOOL
December 6, 1979

Chairman, D. Roger Curtis, called the meeting to order at 8:00 o'clock p.m.

The purpose of said Hearing was to inform the Public of the intent of Utah Power and Light Company to sell portions of Hunter Units one and two to Provo City, Bountiful City, and a group called Intermountain Consumer Power Association. Explanation was given of reasons for concern shown by the Emery County Commission, Emery School District, and Special Service District, because of an eroding tax base as a result of the sale of portions of said Electrical Units.

The question and answer panel for the meeting consisted of County Commissioners D. Roger Curtis, and Rue P. Ware. James E. Fenton of Zions First National Bank, Darrell Leamaster, Special Service District, Randy Jensen, Clerk and Gale Kinder, Superintendent of the Emery School District and Scott Johansen Emery County Attorney. Commissioner Parker was out of the County.

The Public was invited to make response on the proposition to which numerous persons responded.

Many remarks were given by persons representing groups and organizations, others responded as individual property tax payers. All remarks were directed in opposition to the anticipated sale of said Hunter Units one and two.

Shirt McArthur made the following: Motion that we support the Emery County Commissioners One Hundred Percent, and that we make a positive statement to Utah Power and Light, and the Public Service Commission, that we are not in favor of selling any portions of the two plants here. Those characters dangling Units three and four over our heads, can take them somewhere else.

The Motion was seconded by Allan Patterson. Commissioner Curtis called for a vote of those present in favor of or in opposition to the Motion as it had been presented. Everyone was requested to attend the Public Hearing set by the Public Service Commission, December 13, 1979 at 10:00 o'clock a.m. in the Emery County Courthouse. Said Hearing is set so that the public may respond, relative to the sale of Hunter Units one and two.

PUBLIC INFORMATION MEETING

On June 7, 1979, the Utah Public Service Commission ordered Utah Power and Light to sell portions of Hunter Units 1 and 2 to Provo City, Bountiful City, and a group called Intermountain Consumer Power Association.

We, as your County Commissioners are very concerned about the sale for the following reasons:

First, part or all of these buyers are exempt from property taxation, and therefore, Emery County would lose tax revenue needed to build roads, schools, and to provide such things as police and fire protection. The revenue loss will be between \$360,000 and \$1.6 million per year.

Second, if parts of these power plants are removed from the tax rolls, the amount of bonds Emery County can sell is reduced. These bonds are used to build sewer and water facilities and class rooms for our children.

Third, our fiscal agents inform us that such a sale of power plants may change our "bond rate", meaning that Emery County would be charged a higher rate of interest on our bonds, costing the taxpayers of our County more.

Fourth, we feel that local property taxes should be controlled by local elected officials and not by any agency from outside the County.

Fifth, we are concerned that this proposed sale is only the first step and that a pattern of future sales may develop which would place a greater tax burden upon our homeowners, farmers and other owners of private property.

The County Commissioners and school officials are holding a public meeting on December 6, 1979 at 8:00 p.m. in the Emery High School auditorium in Castle Dale to learn your wishes and to receive input from you that we may more fully represent you as these important decisions are made. We need your participation. If you cannot attend, feel free to call or write the Commissioners or school officials.

Also, you are invited to attend the Public Service Commission's public hearing on December 14, 1979, at 10:00 a.m. at the County Courthouse in Castle Dale and tell the Public Service Commission how the people of Emery County feel on this subject.

WHEREAS, the most representative form of democracy in the United States today is that type of government closest to the people: cities, counties, special districts and school districts; and

UP&L LETTER

This letter was received by the Emery County Commission from Utah Power and Light Company.

November 28, 1979

Emery County Commission
Courthouse
Castle Dale, Utah 84513

Scott Johansen
Emery County Attorney
Courthouse
Castle Dale, Utah 84513

Gentlemen:

Reference is made to our recent discussions concerning business done or not done with certain business in Emery County which have made complaint that their services were not being used by Emery Mining Corporation or Utah Power & Light Company. You particularly indicated Tracy's Conoco Service Station. You also mentioned concern over purchases from the KNT Tire Company.

Emery Mining Corporation and Utah Power & Light Company's records of payments to Tracy's Conoco and other related suppliers over the past ten months is as follows:

Tracy's Conoco	\$457,193.74
Dinosaur Tire Co.	105,059.84
World Tire Co.	21,403.44
KNT Tire Co.	591.13

You will note that in excess of \$450,000 has been paid to Tracy's Conoco since January of this year, which amount is not inconsiderable.

Utah Power & Light Company is obliged to solicit goods and services through the competitive bid process. Whereas the above figures are significant, Tracy demonstrates a reluctance to compete as witnessed in a recent attempt to include them in the bid process for purchasing tires. Invitation to bid, inquiry number 9291, date 4-18-79, was sent to Tracy and others with a closing date of 7-27-79. Tracy did not respond. Purchasing called Tracy on the specified closing date and was informed that they had not received the inquiry. Purchasing again sent copies of the inquiry and allowed a bid period extension to 8-9-79. Again Tracy failed to submit a bid within the specified time frame and the order was placed with a competitor.

Concerning other problems in dealing with Tracy's Conoco, we point out the following specifics by Emery Mining Corporation:

1. Tracy has told us a number of times that he really doesn't care whether he has our business and that if it is going to be any inconvenience to him, he would prefer that we take it elsewhere.
2. When it appeared that gasoline might become scarce this spring, he was the first to notify us that our paperwork requirements were too time consuming and that he preferred we buy our gas elsewhere.
3. We called him for some tire repair parts and were told that he had what we needed but that he was just locking up and we would have to wait until tomorrow to get them.
4. We purchased some oil, and when we informed him it was for Central Warehouse, he stated it was too bad it was not for Wilberg as he would have given us a better price.
5. We called fairly late on an afternoon shift for an emergency tire repair and were told we would have to wait until the next day.
6. We made a number of requests to have him inflate and repair tires on equipment that was in the July sale, and finally, out of frustration, had to get another vendor at the last minute to work all night and the early morning of the sale to get the work accomplished.
7. He has told us that he will sell us tires, but that he doesn't want to quote them. The quotes we have received from him appear to be full retail.
8. He entered into a discussion with Ray Christensen, accusing Joe Hauzen of telling him that the reason Dinosaur Tire was getting the tire bids was because of Tracy's poor tire service. In checking with Joe, he denied ever talking to Tracy on the subject.
9. Tracy appears to have the vendor/customer relationship backwards in that he has given us the distinct impression that Emery Mining Corporation is obligated to do business with him on his terms.
10. We believe it is our responsibility to get the best product and service at the lowest price available, and that if a vendor does not want to compete, it becomes our obligation to look elsewhere to that service or product.

We would be pleased to discuss this subject with you further at your convenience, but it does appear that the purchasing relationships have been reasonably handled.

Very truly yours,

/s/ S. G. Baucom

(5)

POLLUTION BONDS FOR UTAH POWER AND LIGHT HUNTER PLANT UNIT THREE AND FOUR

Utah Power and Light Company representative, Verl Topham, and Roger McDonna of Jones, Waldo, Holbrook and McDonna, Bond Council for Utah Power and Light met with the Commissioners to discuss a resolution by the Commissioners for preliminary approval to sell Pollution Control Bonds to finance pollution control facilities for Hunter Units 3 and 4 located south of Castle Dale, Utah. Verl Topham then stated that it was necessary at this time to get enabling legislation passed, by the Commission on the Pollution Control Bonds for both Units 3 and 4 since the Company could no longer postpone construction. A memorandum of understanding between the Power Company and Emery County was presented by County Attorney Scott Johansen and discussed. Mr. Topham agreed to execute said document (included in these minutes for the public record) for the Power Company. It was moved by Commissioner Ware that the Chairman of the Emery County Commission be authorized to sign the memorandum of understanding for the County. The motion was seconded by Commissioner Parker and passed unanimously.

Mr. Topham stated that as per the request of the Emery County Commission, Mr. Harry Blundell, President of Utah Power and Light Company had instructed his personnel to remove the sign located on the County property near U-10 south of Castle Dale, and that his hopes were that in a future informal meeting with the County Commissioners a new format for the replacement of that sign could be approved.

Mr. Topham then asked Mr. McDonna to give Bond Council interpretation on common facilities for Unit 3 and 4 of the Hunter Plant. He also requested that the Commission sign the enabling legislation on both plants at once, although only certain facilities are built during the construction phase of the first unit. Commissioner-Ware stated that he would like to know if the resolution for Hunter Units 1 and 2 were signed concurrently, and Mr. McDonna responded that they were signed together in February of 1974. Verl Topham stated that the two units mentioned were a "togetherness" project and that if Utah Power and Light were to build any additional projects after Unit 3 and by the time of projected need, 1985, it would be Hunter Unit 4 even if it was built without tax free pollution control financing. Bill Thurmond and Scott Johansen quizzed Bond Council on the resolution as per statement in the contract referring to rental, sale, disposal, and operation of the purchased pollution control facilities. The Commission was assured that there were no ramifications where any liability could fall back onto the County.

Mr. Topham also assured the Commissioners that the Plant was a "zero discharge" plant and that no polluted water would leave the plant site and enter any waterways or non-project land. Utah Power and Light plans to irrigate land and use up its used water in that manner.

Commissioner Ware moved that the Commissioners act favorably on a resolution to issue Pollution Control Bonds for Units 3 and 4 of the Hunter Plant. He further moved that the resolution be passed only with a reservation concerning statements made by Utah Power and Light's employees and their Bond Council as per the need for a joint resolution in order to obtain Pollution Control Bonds at a tax free rate for both units and not in accordance with recommended changes as per County Attorney Scott Johansen which requested a single resolution for each plant. The stipulated motion was seconded by Commissioner Curtis and passed unanimously by all Commissioners. The enabling resolution was then executed by all required parties.

Commissioner Parker left the meeting at this time.

(6)

BILL THURMOND

Bill Thurmond, Special Counsel for Emery County presented copies of approved Provo City contract documents to Emery County for approval. Mr. Thurmond also stated that acceptance of contracts by the County should be accompanied by a withdrawal of our objection being filed with the Public Service Commission. Mr. Thurmond stated that payments in lieu of taxes will be paid prior to November 1, of each year. The obligation of this payment is not clear until the Tax Amendment to the Constitution is passed this fall, if it passes there will be a general election of all voters in the State.

Commissioner Curtis moved that the contracts be accepted and the Chairman instructed to sign the contract between Provo City and Emery County, seconded by Commissioner Ware and passed unanimously of both Commissioners present.

On the sale contract language, the change was indicated to be made that the City was buying only plant interests and not total project interests.

(7)

SECOND SUPPLEMENTAL EQUIPMENT LEASE, SUBLEASE, AND INDENTURE OF TRUST

The Second Supplemental Equipment Lease, Sublease, and Indenture of Trust were presented for approval by Mr. Thurman. A motion was made to accept the documents by Commissioner Ware, seconded by Commissioner Curtis and passed.

(8)

DESERET GENERATION AND TRANSMISSION

The time and place designated in properly advertised had passed and the parties representing Deseret Generation and Transmission were again unable to attend for a closing of contract document. Mr. Thurmond stated that the parties hoped to be able to meet on June 12, 1980 and he would request a meeting if needed at that time.

Motion was made by Commissioner Ware to adjourn the meeting at 4:00 p.m. seconded by Commissioner Curtis, unanimous.

SECTION 4 - DURATION

This Agreement shall remain in effect for fifty (50) years unless sooner terminated as herein provided.

The question they addressed to the Commission is whether or not the Emery Clinic building would be free by the time the Social Services need a new facility.

It was also noted that the Mental Health Service is not paying rent to the County because of a misunderstanding when the Emery Medical Clinic was leased. That will be corrected so that the service can begin paying rent.

The Commissioners asked for more information on construction of a new building and Ms. Alston said she would have to get that information and present it to the Commissioners at a later date.

Re: Proposed Annexations to Castle Valley Special Services District

Dear Sir:

This letter will represent one objection to the annexation to Emery Town of the small parcel of land situated in Section 9, Township 22 South, Range 6 East S.L.B.&M. which is described in the Resolution passed by the Emery County Board of Commissioners on September 3, 1980 and published in the Emery County Progress for the first time on September 4, 1980.

The published description reads, "Section 9 Beginning at a point which is 660.0 feet West and 330.0 South of the Northeast corner of the Northwest 1/4 of the Southeast 1/4 of said Section; thence South 330.0 feet; thence West 1,320 feet; thence North 330.0 feet; thence East 1,320 feet to the point of beginning.

Another Annexation, located in Section 4, Township 22 South, S.L.B. & M. also interests my husband and me as we own a very small parcel of land which abuts the parcel which was annexed in 1978.

We did not particularly object to the annexation of this parcel but the small parcel belonging
Commissioners Minutes

To us should have been annexed to Emery Town at that time but we were not aware of the fact that any
annexations were taking place.

As there was a large area of undeveloped land lying within the corporate boundaries set when Emery
Town was Incorporated in 1901, it did not appear that it was necessary to annex more at that point in
time.

Thank you for your early attention.

Sincerely,

(b) Mr. Johansen presented the Memorandum of Agreement relating to the Inducement Resolution on pollution control bonds for Hunter Units No. 3 and 4. After due consideration of said Inducement Resolution, a motion was made for its acceptance by Commissioner Curtis, a second to the motion was given by Commissioner Ware and approved by those present. Said Memorandum Agreement is as follows and made a part of this minute entry:

MEMORANDUM OF AGREEMENT

THIS MEMORANDUM OF AGREEMENT is between Emery County, Utah, party of the first part (hereinafter referred to as the "County"), and Utah Power & Light Company, a Utah corporation, party of the second part (hereinafter referred to as the "Company")

1. Preliminary Statement. Among the matters of mutual inducement which have resulted in the execution of this Agreement are the following:

(a) The County is authorized and empowered by the provisions of Chapter 17, Title 11, Utah Code Annotated, 1953, as amended, known as the "Utah Industrial Facilities Development Act" ("Act"), to issue pollution control revenue bonds for the purpose of defraying the cost of financing or acquiring, constructing, improving and equipping water and air pollution control facilities and to finance the same for, or to lease, sublease or sell the same to, others at such rentals or prices and upon such terms and conditions as the County may deem advisable.

(b) In order to reduce, prevent, abate and eliminate water and air pollution within the County by reason of the operations of the Company which is acquiring and constructing two additional coal-fired 400,000 kw units at its Hunter electric generating plant located in the County and known as the "Hunter Plant" ("Hunter Plant Units 3 and 4"), the County proposes to finance or acquire certain interests in land within the County ("Project Site"), to finance or acquire, construct, improve and equip structures, equipment, improvements and other facilities useful for the purpose of reducing, preventing, abating and eliminating water and air pollution by reason of the operations of the Company at Hunter Plant Units 3 and 4 ("Hunter Plant Units 3 and 4 Pollution Control Facilities") to be located on the Project Site, all as described in Exhibit "1" hereto (the Project Site and the Hunter Plant Units 3 and 4 Pollution Control Facilities being hereinafter referred to as the "Hunter Plant Units 3 and 4 Pollution Control Project"), and to finance the Hunter Plant Units 3 and 4 Pollution Control Project for, or to lease, sublease or sell the Hunter Plant Units 3 and 4 Pollution Control Facilities (and, if necessary or desirable, any interest in the Project Site held by the County) to, the Company, to be used by the Company to reduce, prevent, abate and eliminate water and air pollution in the County by reason of its operations as aforesaid.

(c) It is deemed necessary and advisable for the reduction, prevention, abatement and elimination of water and air pollution within the County at Hunter Plant Units 3 and 4 and the promotion of the general health and welfare of the inhabitants of the County that the Hunter Plant Units 3 and 4 Pollution Control Project be undertaken at the earliest practicable date, but the Company requires satisfactory assurances from the County that the proceeds of the sale of pollution control revenue bonds of the County will be made available to finance the Hunter Plant Units 3 and 4 Pollution Control Project.

(d) Representatives of the County have indicated the willingness of the County to proceed with and effect such financing in order to assist the Company to reduce, prevent, abate and eliminate water and air pollution at Hunter Plant Units 3 and 4 within the County and have advised the Company that, subject to due compliance with all requirements of law and the Act as then in force and the obtaining of all necessary consents and approvals and to the happening of all acts, conditions, and things required precedent to such financing, the County, by virtue of such statutory authority as may now or hereafter be conferred, will issue and sell its pollution control revenue bonds in an aggregate principal amount sufficient to pay the costs of the Hunter Plant Units 3 and 4 Pollution Control Project, currently estimated at One Hundred Forty Two Million Dollars (\$142,000,000), but not to exceed Two Hundred Million Dollars (\$200,000,000), such bonds to be payable from the rentals, revenues and receipts from the Company and not to be general obligations of the County nor to constitute nor give rise to a pecuniary liability of the County nor a charge against its general credit or taxing powers.

(e) The County considers that the financing or acquisition, improvement and equipment of the Hunter

Plant Units 3 and 4 Pollution Control Project and the financing of the same for, or the leasing, subleasing or sale of the same to, the Company will promote the reduction, prevention, abatement and elimination of water and air pollution within the County and thereby promote the general health and welfare of the inhabitants of said County.

2. Undertakings on the Part of the County. Subject to the conditions above stated, the County agrees as follows:

(a) That it will authorize, or cause to be authorized, the issuance and sale of an issue or issues of its pollution control revenue bonds, pursuant to the terms of the Act as then in force, in an aggregate principal amount sufficient to pay the costs of the Hunter Plant

Commissioners Minutes

Units 3 and 4 Pollution Control Project and currently estimated at One Hundred Forty Two Million Dollars (\$142,000,000), but not to exceed Two Hundred Million Dollars (\$200,000,000).

(b) That it will cooperate with the Company to endeavor to find a purchaser or purchasers for the bonds, and if purchase arrangements satisfactory to the Company and the County can be made, it will adopt, or cause to be adopted, such proceedings and authorize the execution of such documents as may be necessary or advisable for the authorization, issuance, and sale of the bonds and the financing or acquisition, improvement and equipment of the Hunter Plant Units 3 and 4 Pollution Control Project, as aforesaid, and the financing of the Hunter Plant Units 3 and 4 Pollution Control Project for, or the leasing, subleasing or sale of the Hunter Plant Units 3 and 4 Pollution Control Facilities (and, if necessary or desirable, any interest in the Project Site held by the County) to, the Company, all as shall then be authorized by law and shall be mutually satisfactory to the County and the Company.

(c) That the aggregate payments, basic rents or sale price (i.e., the amounts to be used to pay the principal, interest and premium, if any, on the bonds), payable under the instrument whereby the Hunter Plant Units 3 and 4 Pollution Control Project shall be financed for, or the Hunter Plant Units 3 and 4 Pollution Control Facilities (and, if necessary or desirable, any interest held by the County in the Project Site) shall be leased, subleased or sold to, the Company shall be such sums as shall be sufficient to pay the principal of and interest and redemption premiums, if any, on the bonds as and when the same shall become due and payable, and if sold or leased or subleased to the Company, the Company shall be entitled to acquire the interest of the County in the Hunter Plant Units 3 and 4 Pollution Control Project for an aggregate amount equal to the amount required to retire the outstanding bonds, plus an amount to be prescribed in such instrument which shall not, without the Company's consent and agreement as aforesaid, exceed One Dollar.

(d) That it will take or cause to be taken such other acts and adopt such further proceedings as may be required to implement the aforesaid undertakings or as it may deem appropriate in pursuance thereof.

3. Undertakings on the Part of the Company. Subject to the conditions above stated, the Company agrees as follows:

(a) That it will use all reasonable efforts to find one or more purchasers for the bonds in an aggregate principal amount sufficient to pay the costs of the Hunter Plant Units 3 and 4 Pollution Control Project, currently estimated at One Hundred Forty Two Million Dollars (\$142,000,000), but not to exceed Two Hundred Million Dollars (\$200,000,000).

(b) That it will enter into a contract or contracts for the financing or acquisition, construction, improvement and equipment of the Hunter Plant Units 3 and 4 Pollution Control Facilities on the Project Site, and at the time of the delivery of the bonds, if the Hunter Plant Units 3 and 4 Pollution Control Facilities (and, if necessary or desirable, any interest in the Project Site held by the County are to be leased, subleased or sold to the Company, it will convey the Project Site, or interest therein, and assign such contracts to the County.

(c) That contemporaneously with the delivery of the bonds it will enter into a lease agreement, sublease agreement, purchase agreement or loan agreement with the County under the terms of which the Company will obligate itself to pay to the County sums as specified in such agreement as shall be sufficient in the aggregate to pay the principal of and interest and redemption premiums, if any, on the bonds as and when the same shall become due and payable.

(d) That it will take or cause to be taken such further acts and adopt such further proceedings as may be required to implement its aforesaid undertakings or as it may deem appropriate in pursuance thereof.

4. General Provisions.

(a) All commitments of the County under paragraph 2 hereof and of the Company under paragraph 3 hereof are subject to the conditions that within a reasonable time hereafter, taking into account the nature of the Hunter Plant Units 3 and 4 Pollution Control Project and the estimated period of acquisition and construction thereof, the County and the Company shall have agreed to mutually acceptable terms for the bonds and of the sale and delivery thereof, including reimbursement of the County for all reasonable and necessary out-of-pocket expense, including reasonable attorneys' fees, incurred by the County arising from the execution of this Agreement and the performance by the County of its obligations hereunder, and mutually acceptable terms and conditions of the lease agreement, sublease agreement, purchase agreement or loan agreement referred to in paragraph 3 and the proceedings referred to in paragraphs 2 and 3 hereof.

(b) If the events set forth in (a) of this paragraph do not take place within a reasonable time hereafter, taking into account the nature of the Hunter Plant Units 3 and 4 Pollution Control Project and the estimated period of construction thereof, and Pollution Control Revenue Bonds to an aggregate principal amount sufficient to pay the costs of the Hunter Plant Units 3 and 4 Pollution Control Project and currently estimated at One Hundred Forty Two Million Dollars (142,000,000), but not to exceed Two Hundred Million Dollars (\$200,000,000), are not sold within such time, the Company agrees that it will reimburse the County for all reasonable and necessary direct out-of-pocket expenses, including reasonable attorneys' fees, which the County may incur arising from the execution of this Agreement and the performance by the County of its obligations hereunder, and this Agreement shall thereupon terminate.

IN WITNESS WHEREOF, the parties hereby have entered into this Agreement by their officers thereunto duly authorized as of the 30th day of May, 1980.

EXHIBIT 1

TO MEMORANDUM OF AGREEMENT REGARDING
HUNTER PLANT UNITS 3 AND 4 BETWEEN EMERY
COUNTY, UTAH, AND UTAH POWER & LIGHT COMPANY

HUNTER PLANT UNIT 3
(Current Estimated Cost \$68,750,000)

Particulate Emission Control

The dust removal system is to be a baghouse with a guaranteed emission limit of .03 lb/M Btu. The stack exhaust gases are directed through fabric filters which trap and remove fly ash and other particulates.

Cooling Tower

The tower will be of a wet type design with seventeen cells. It will be designed and guaranteed to cool 160,000 gpm of water.

Ash System

The ash handling system consists of hydraulic system to transport heavy ash and pneumatic system to transport the lighter fly ash. The wet ash will be discharged to dewatering bins. The fly ash will be handled dry and stored in an ash silo. From the dewatering bins and the ash silo, the ash will be conveyed to a pugmill mixer and mixed with damp filter cake from the scrubber. The mixture will be transported to a diked ash disposal storage area in a damp condition. Stored ash will be covered with soil. Any water drained from this area will be impounded to prevent any discharge into any natural streams and other waterways located outside the Project Site.

Stack

The stack is concrete with a brick liner. It is 600 feet high, fifty-six feet outside diameter at the base and twenty-four feet inside diameter at the top.

Sewage Treatment Plant

The plant will process 10,600 gallons per day of sewage waste through an aeration-clarification-chlorination process. Liquid effluent will be stored in an isolated pond until it is evaporated. There will be no seepage or overflow, hence no chance for effluent to flow into Rock Canyon Creek and other waterways located outside the Project Site.

Waste Water System

A holding basin will collect reusable water from the various plant drains. The reusable water will be pumped back to the cooling tower basin and the ash water storage tank or remain in the holding basin. The non-reclaimable waste water will be collected in a waste disposal basin, then be pumped to an evaporation pond. There will be no discharge to any natural stream and other waterway located outside the Project Site.

NOx

The NOx emissions from the boiler will be controlled by an overfire air system. Overfire air ports are located in the upper portion of the wind boxes with pneumatic operated dampers to control the admission of overfire air to the furnace.

SO₂ Removal Equipment

The gas stream containing the SO₂ will be cleaned of particulates in the baghouse prior to entering the scrubber system. Gas enters a vertical spray tower where SO₂ is removed by contact with a limestone slurry. The gas on leaving the scrubber will then pass through a mist eliminator section where a large portion of the moisture will be removed. Following the mist eliminator, a reheater will be employed to raise the temperature of the gas and dry it prior to the gas entering the booster fan and thence to the stack. On the liquid side of the scrubber system starting at the water supply point and following through the system, the process is briefly as follows:

Water is mixed with pulverized limestone in a mixing tank. The slurry is then pumped to the scrubber.

After reacting with the gases, the slurry then collects in an internal tank under the sprays. The slurry is recycled to the spray tower and part is bled to a thickener where the sludge is removed and the clear liquid transferred back to the scrubber. Sludge from the thickener will be transferred to a vacuum filter for further removal of the water and discharge of the relatively dry cake to be mixed with fly ash and disposed of. The system will be designed to handle some cooling tower blowdown.

HUNTER PLANT UNIT 4
(Current Estimated Cost \$73,250,000)

Particulate Emissions Control

The dust removal system is to be a baghouse with a guaranteed emission limit of .03 lb/M Btu. The stack exhaust gases are directed through fabric filters which trap and remove fly ash and other particulates.

Cooling Tower

The tower will be of a wet type design with seventeen cells. It will be designated and guaranteed to cool 186,000 gpm of water.

Ash System

The ash handling system installed for Unit 3 will be extended to accommodate Unit 4. For Unit 4, the ash handling system will consist of a hydraulic system to transport heavy ash and a pneumatic system to transport lighter fly ash. Ash will be treated in equipment supplied for Unit No. 3 but supplemented by an additional fly ash silo.

Stack

The stack is concrete with a brick liner. It is 600 feet high, fifty-six feet outside diameter at the base and twenty-four feet inside diameter at the top.

NOx

The NOx emissions from the boiler will be controlled by an overfire air system. Over-fire air ports are located in the upper portion of the wind boxes with pneumatic operated dampers to control the admission of overfire air to the furnace.

Board of County Commissioners
Emery County Courthouse
Castle Dale, UT 84513

September 29, 1980

ATTN: Donald R. Curtis, Chairman

SUBJECT: Comments on Incorporation of Trail Canyon Town

Dear Chairman Curtis:

The Castle Valley Special Service District has reviewed the proposed Incorporation of Trail Canyon Town in Huntington Canyon and discussed it during their regular Board Meeting on September 18, 1980. We wish to go on record in this hearing as being opposed to the Incorporation.

The main reasons for our opposition are as follows:

Commissioners Minutes
October 1, 1980

1. One of the main objectives of the CVSSD is to provide culinary water that is safe in all respects for human consumption. In order to do this, we are vitally concerned with the protection of our watersheds and oppose anything that may further deteriorate or abuse them.

We feel that the incorporation of Trail Canyon as it is proposed would lead to an expanded growth all along the State Highway from Bear Canyon to Trail Canyon and expanded growth in the Bear Canyon area. This growth would all be close to the Huntington River, and the likelihood of contamination of our water supply would be greatly increased.

This growth would be under the jurisdiction of Trail Canyon Town and not under the County Zoning or any other restrictions. We are very fearful the growth might be done in a haphazard fashion with little or no control. Further, Trail Canyon Town would not be under the jurisdiction of the County, CVSSD, Huntington City, or any other political body, and it would be very difficult to get them to correct any problems that did arise.

From the standpoint of health and our watershed protection we oppose the incorporation.

2. The policy of the Castle Valley Special Service District has been to include all incorporated communities in the western portion of Emery County into our boundaries. We assume that at some time the Trail Canyon community may wish to be included in the District. However, we see the potential for extremely expensive water, sewer, and street improvements within the proposed boundaries. The rough and rugged terrain along with the large area included within the boundaries could make these kinds of improvements extremely expensive. The requirements for roads alone could be extremely expensive because of the layout and terrain. We, simply stated, are not looking for more problems at this time.

On the other hand, the potential for tax revenue from the area is extremely limited. Ownership of much of the property belongs to the Federal Government and is administered by the Forest Service and the Bureau of Land Management. These lands would be tax exempt, and revenues would be extremely limited. The income would just not match the expenses.

3. Huntington City and the CVSSD have applied a considerable amount of pressure upon the Co-op Mine to clean up Trail Canyon Stream and to work out an acceptable agreement on the Bear Canyon Spring. The County has also wanted several items changed to comply with their ordinances. We feel that in many respects this pressure has led to this incorporation move. Their incorporation would basically be an escape move to free them from the scrutiny of the County and the CVSSD.

Their track record in controlling themselves has not been that good, and we are concerned about the lack of input we would have in matters that directly concern us.

It is the recommendation of the Castle Valley Special Service District that this request for incorporation be denied. Thank you for the opportunity of making this part of the public record.

Very truly yours,

/s/ DARREL V. LEAMASTER
District Manager

Emery County Commission
P.O. Box 457
Castle Dale, Utah 84513 Dear Commissioners:

September 30, 1980

Utah's Division of Wildlife Resources has some serious concern relative to incorporation of the area that has been described as "Trail Canyon." The area represents high value habitats for Utah's wildlife. As you know incorporation of this area would allow additional town development where residences are now located in Trail Canyon and expansion of such along 1.75 miles of State Highway 31 in Huntington Canyon and probable development in Bear Creek Canyon. Such activity would not be in the best interest of wildlife management.

It is our understanding that if incorporation was disallowed that county zoning now precludes any further residential development in that specific area. Such an action would be of benefit to management of local wildlife.

Generally speaking the "Trail Canyon" town area is inhabited on occasion and during various seasons of the year by approximately 368 species of vertebrate wildlife (14 species of fish, 7 species of amphibians, 20 species of reptiles, 242 species of birds and 85 species of mammals). Of these species 83 percent have a status of "protected" under state laws. The local populace enjoys all of these wildlife through consumptive (hunting, fishing and trapping) and non-consumptive (nature observations) activities. Habitats that support mule deer, elk and trout fishery are of special importance to local sportsmen. In the "Trail Canyon" town area wild-land habitats are of crucial-critical and high-priority value to those species of wildlife that have high interest to the local populace.

In past years there has been continual deposition of trash along Trail Creek in proximity to the residences; discharge of human waste into Trail Creek has also been a problem. And, the mining operation has resulted in significant deposition of coal into Trail Creek. All of these pollution problems have reached and degraded Huntington Creek. It is important to note that Huntington Creek is

a high-priority (Class 3) trout fishery and represents a limited resource in southeastern Utah.

Within Trail Canyon, Huntington Canyon and Bear Canyon the canyon floor represent habitats of crucial-critical value to wintering mule deer. The more precipitous terrain and wind blown slopes at higher elevations in those canyons represent crucial-critical valued winter range for elk. It is important to note that crucial-critical ranges are limited and when impacted result in loss to carrying capacity for wild lands. More simply stated, this means the local area if impacted, will have less deer and elk to serve the demands of the public.

Commissioners Minutes
October 1, 1980

It seems that the residents of "Trail Canyon" area would want others to believe that pollution problems could be solved by mere incorporation of the area. The Division believes that pollution problems can be solved through community efforts whether the "Trail Canyon" area is incorporated or not incorporated. If incorporation is allowed the loss of crucial-critical habitats for big game and disturbance factors to the animals caused by human inhabitation will increase in Trail Canyon and spread along Huntington Canyon and into Bear Canyon.

Utah Division of Wildlife Resources recommends that incorporation of the "Trail Canyon" area be disallowed in order that wildland habitats be maintained for traditional uses of wildlife inhabitation and livestock husbandry. It is hoped that the Commission will direct municipal growth to areas of established communities where public services can be provided at minimum cost to all county residents.

Thank you for your consideration.

Sincerely,

/s/ LARRY J. WILSON
Supervisor

October 6, 1980

Gentlemen:

I am offering the following written comments to supplement my oral statement of October 1, 1980 at the County Commissioners hearing on the Trail Canyon Town incorporation.

As I understand the proposal, the following public lands are included for incorporation:

T16S, R7E, Section 26: E1/2SW1/4, SW1/4NW1/4
 Section 27: NE1/4NE1/4

Although Federal law may not prohibit these lands from being incorporated, incorporation would not give the town of Trail Canyon any special privileges for use of the land. City facilities placed on the land would still require a permit or right-of-way. Also, incorporation would be subject to any valid existing rights which presently include several rights-of-way. The land in question is presently under a power site withdrawal which may affect incorporation.

We have some other basic concerns with the incorporation proposal. In 1979 we completed a Management Framework plan for the San Rafael Resource Area. In the MFP decisions were made to protect Huntington Canyon for use as crucial big game habitat for mule deer, elk and moose. Also, to designate and protect the watershed that feeds Huntington Creek, and the creek itself from degradation that might have a harmful effect on Huntington City culinary water supply.

We fear additional growth in the Trail Canyon and Bear Canyon areas that incorporation might bring could have a drastic effect on crucial wildlife habitat and the quality of Huntington City water.

We appreciate the opportunity to comment on this proposal. If you have any questions concerning our comments please let me know.

Sincerely yours,

/s/ SAMUEL R. ROWLEY
Area Manager

Commissioner Curtis stated that in concurrence with preponderance of the evidence submitted here today, in opposition to the petition for incorporation of Trail Canyon Town; he moved by motion that the petition for incorporation of Trail Canyon Town, be denied. Said motion was seconded by Commissioner Ware and approved by those present.

Thurman, special legal counsel for the County, dated September 5, 1980 enclosing four copies each of revised documents consisting of Second Supplemental Indenture of Trust, Second Supplemental Equipment Lease and Second Supplemental Equipment Sublease all dated as of August 1, 1980, pertaining to the sale by Utah Power & Light Company of portions of its Stations known as the First Unit of the Emery (now Hunter) generating plant to Provo City, Utah and Bountiful City, Utah. The County Attorney stated that the Commission had at its regular meeting held on June 18, 1980 approved previous similar documents and authorized their execution on behalf of Emery County, but that subsequent thereto, Chapman Cutler, bond counsel for First Security Bank of Utah, Trustee, had recommended certain changes in the documents as approved by the Commission on June 18, 1980. The County Attorney concurred in Mr. Thurman's opinion and accordingly, presented the revised documents dated as of August 1, 1980 with the recommendation that the same be approved and that the presented the revised documents dated as of August 1, 1980 with the recommendation that the same be approved and that the previous action of the Commission on June 18, 1980 respecting the prior documents in this matter be vacated and set aside.

The County Attorney stated that he had received a letter from William T. Thurman, Special Legal Counsel for the County, dated October 14, 1980, enclosing a copy of a proposed resolution amending a prior resolution adopted by the County Commission on September 23, 1974 regarding the issuance of pollution control revenue bonds with respect to Hunter I and II. The County Attorney further stated that the purpose of the instant resolution was to provide for the issuance by the County of its pollution control revenue bonds to finance the purchase by Deseret Generation & Transmission Cooperative of an undivided 39.69% interest in Hunter II and an undivided 19.845% interest in the Common Facilities, together with a related undivided interest in the real property on which Hunter II and the Common Facilities are located. Mr. Johansen also stated that Mr. Thurman's letter sets forth that the latter had examined the resolution and that same is in satisfactory form and is in conformity with the understanding recently reached between the County, Utah Power & Light Co., Deseret and other parties involved in proceedings before the Utah Public Service Commission which culminated in the latter's order of September 17, 1980. The County Attorney concurred in Mr. Thurman's opinion as to the sufficiency of the resolution and accordingly presented the same with the recommendation that it be approved.

Thereupon, the following resolution was introduced in written form by Commissioner Ware, was read in full, and pursuant to and on motion duly made by Commissioner Ware and seconded by Commissioner Parker, was unanimously adopted by the following vote:

Aye: DONALD R. CURTIS

WHEREAS Emery County, Utah ("County") is authorized and empowered by the provisions of Chapter 17, Title 11, Utah Code Annotated, 1953, as amended, known as the "Utah Industrial Facilities Development Act" ("Act"), to issue pollution control revenue bonds for the purpose of defraying the cost of financing, acquiring, improving or equipping pollution control facilities and to finance the same for, or lease or sell the same to, others upon such terms and conditions as the County may deem advisable; and

WHEREAS the County, in a resolution ("Prior Resolution") adopted at a Special Meeting of the County's Board of County Commissioners held on September 23, 1974, approved the execution of a Memorandum of Agreement ("Agreement") between the County and Utah Power & Light Company ("Company") whereby the County, among other things, agreed to authorize, or cause to be authorized, the issuance and sale of an issue or issues of its pollution control revenue bonds pursuant to the terms of the Act in an aggregate principal amount sufficient to pay the costs of certain pollution control facilities described in Exhibit A to the Agreement, some of which were to be installed as part of the Emery Plant (now called and hereinafter referred to as the "Hunter Station"), consisting of a two-unit coal-fired steam electric generating plant to be constructed by the Company and located within the boundaries of the County; and

WHEREAS it was the intent of the County's Board of County Commissioners at the time it adopted the Prior Resolution that the County would issue its pollution control revenue bonds in order to finance the pollution control facilities described in Exhibit A to the Agreement; and

WHEREAS Deseret has requested that, in recognition of the County's original intention to finance such

pollution control facilities, the County adopt a resolution amending the Prior Resolution so as to authorize the Company to assign to Deseret that portion of the rights granted to, and the obligations imposed upon, the Company in the Agreement to the extent that such rights and obligations are attributable to any undivided ownership interest in Hunter II and the Common Facilities that Deseret may acquire from the Company and thereby provide for the issuance by the County of its pollution control revenue bonds to finance that portion of Deseret's purchase price for Hunter II and the related Common Facilities which is attributable to the pollution control facilities described in Exhibit A to the Agreement which the County originally agreed to finance for the benefit of the Company; and

Commissioners Minutes
October 15, 1980

WHEREAS Deseret requires satisfactory assurances from the County that the proceeds of the sale of the County's pollution control revenue bonds in an aggregate principal amount sufficient to pay the costs of the pollution control facilities included as part of any interest which Deseret may acquire in Hunter II, including any related Common Facilities, and currently estimated at \$28,600,000 will be made available to finance Deseret's acquisition of an undivided ownership interest in such pollution control facilities; and

WHEREAS the County deems it necessary and advisable that it take such action as may be required under applicable statutory provisions and the Act to authorize and issue pollution control revenue bonds to finance Deseret's acquisition of an interest in such pollution control facilities; and

WHEREAS it is intended that the Prior Resolution and Agreement, as amended by this Resolution and the assignment by the Company to Deseret of a portion of the rights granted and obligations imposed by the Agreement, shall constitute "some other similar official action, within the meaning of Treasury Regulations Section 103-8(a) (5), toward the issuance of the County's pollution control revenue bonds to finance Deseret's acquisition of an undivided ownership interest in the pollution control facilities described in Exhibit A of the Agreement;

SECTION 2. That all resolutions and parts thereof in conflict herewith are hereby repealed to the extent of such conflict.

SECTION 3. That immediately after its adoption this resolution shall be signed by the Chairman and County Clerk, shall be recorded in a book kept for that purpose and shall take immediate effect.

Thereupon, the Clerk was ordered and directed to enter the foregoing proceedings upon the records of the Board of the County Commissioners.

The County Attorney stated that he had received a letter from William T. Thurman, special legal counsel for the County, dated October 10, 1980 enclosing seven copies each of revised documents consisting of Third Supplemental Indenture of Trust, Third Supplemental Equipment Lease and Third Supplemental Equipment Sublease all dated as of October 1, 1980, pertaining to the sale by Utah Power & Light Company of portions of its Stations known as the Second Unit of the Emery (now Hunter) generating plant to Deseret Generation and Transmission Cooperative. The County Attorney stated that the Commission had, at its regular meeting held on October 1, 1980 approved previous similar documents pertaining to the sale by Utah Power & Light Company of portions of its First Unit of the Emery (now Hunter) generating plant to Provo City, Utah and Bountiful City, Utah. The County Attorney also stated that Mr. Thurman's letter sets forth that he has reviewed the present documents as prepared by Mudge, Rose, Guthrie and Alexander, counsel for Deseret and that in Mr. Thurman's opinion the present documents redefine the meaning of the term "Project" as used in the documents to exclude therefrom the portions of said Stations being acquired by Deseret and that said present documents are satisfactory and serve the same purpose with respect to Deseret as was served by the previous documents with respect to Provo City and Bountiful City. The County Attorney concurred in Mr. Thurman's opinion as to the sufficiency of the present documents and accordingly, presented the documents dated as of October 1, 1980 with the recommendation that the same be approved.

Thereupon, after full discussion and on motion duly made by Commissioner Ware and seconded by Commissioner Curtis, the following resolution was unanimously adopted:

RESOLVED, That the Third Supplemental Indenture of Trust, Third Supplemental Equipment Lease and Third Supplemental Equipment Sublease all dated as of October 1, 1980 respecting the sale by Utah Power & Light Company, of portions of its Stations known as the Second Unit of the Emery (now Hunter) generating plant to Deseret Generation and Transmission

MINUTES OF THE REGULAR MEETING
OF THE BOARD OF EMERY COUNTY COMMISSIONERS
HELD IN THE
ASSEMBLY ROOM AT THE FAUSETT MORTUARY
October 15, 1980

Those present were Commissioners D. Roger Curtis, Rue P. Ware, and John I. Parker. Attorney Scott Johansen and Clerk Glen P. Bott.

Chairman Curtis called the meeting to order at 7:00 o'clock p.m. Invocation was given by Scott Johansen.

(1)

LAMAR GUYMAN

County Sheriff, Lamar Guyman, stated that certain deputies had intentions of leaving the County Sheriffs Department for positions paying a higher salary. Sheriff Guyman recommended that a \$100.00 per month salary increase be allowed.

It was stated that said increase could be granted to twenty-three of the lower paid deputies and the Departmental Operation would still remain within the present allocated yearly budget. After further consideration was given, Commissioner Curtis made the motion that the monthly wage increase be allowed, as submitted by Sheriff Guyman. The motion was seconded by Commissioner Ware and given unanimous approval.

(2)

BEAVER CREEK COAL CO.

Andrew R. Esparza and Dan W. Guy, representing Beaver Creek Coal Company and Marfort W. Smith, U.S. Forest Service, made their appearance with interests relating to road improvement in Mill Fork Canyon. Request was made for improvement on two and one half miles of public road, from the Huntington Canyon Forest Service Road No. U-31, to the Beaver Creek Coal Mine. A history of the Beaver Creek Mine development was given by Mr. Esparza. The request was made for Emery County to assume the responsibility of maintenance and development of said, two and one half miles of public road. Commissioner Curtis responded, that Emery County has received many requests for road construction, prior to the present petition by Beaver Creek Coal Company. Due to the limited funds available for County road construction, and construction costs having raised to such excessive high rates, road construction in Emery County has been held at a maximum. Mr. Esparza suggested to outline in written form, the benefits that the Beaver Creek Coal operation brings to Emery County, and present his findings to the County Commissioners, at a future meeting. Said request was given approval.

(3)

CASTLE DALE CITY

(a) Bruce Anderson, Councilman and Charles W. Taylor, Attorney for Castle Dale City, presented a written contract for law enforcement in Castle Dale City. Said Law Enforcement Contract was given to Emery County for review and amendment.

(b) Request was made for Emery County to construct an entrance street from Castle Dale Center Street, due west to Valley View Estates. Said highway would be located adjacent to the south boundary of a proposed recreational complex site south of the Emery County High School. Reply was given that Emery County would not make a commitment for construction of said access highway, as Emery County and the Emery School District have not negotiated an agreement for the proposed recreation complex. The Commissioners agreed that if in the future an agreement is completed, with the School District and Emery County a joint venture would be acceptable.

(4)

JIMMY STAKER

Mr. and Mrs. Jimmy Staker presented the following items:

(a) Mr. Staker made a complaint of the ten acre requirement in the County Planning and Zoning Ordinance. The statement was made that he had sold ten acre plots of non-irrigated land, on which County Building Permits have not been approved. Mr. Staker said, "That he had not sold irrigated farm land, in an effort to preserve the available farm land in Emery County." Request was made that the Planning and Zoning Ordinance be given further consideration, by the Emery County Planning Commission; relating to the five (5) acre clause, in the ten acre requirement.

(b) Mr. Staker made request for hard surface application on the county road, bypassing his property. A commitment could not be made due to the limited road funds in the present County Road Budget. Mr. Staker requested culverts, on three exits off said county road, to his farm property. This request was to be referred to the County Road Supervisor for consideration to provide the necessary culverts when available.

(5)

SCOTT JOHANSEN

(a) Scott Johansen presented the Third Supplemental Indenture of Trust, the Third Supplemental Equipment Lease, and the Third Supplemental Equipment Sublease dated October 1, 1980 for Unit No. 2, at the Hunter Plant, of the Utah Power & Light Co. seconded by Commissioner Curtis with unanimous approval.

Attention Commissioner John Parker

Huntington City is willing to transfer the rodeo arena property with a culinary water connection, and the Cattlemen's Association have indicated to us that they will transfer an adjacent parcel of land to Emery County for a new county fair complex.

There will be about 40 acres available in these transfers and this area is located just across a city street from the new baseball complex.

As you are aware, access to this area can be provided from two ways. Although this area is not located on our main street, we feel that it will be convenient for anyone who is not acquainted with our area to easily locate.

We urge you to give serious consideration to this area for a county fair complex. Sincerely,

/s/ DREW RICHARDS

Mayor, Huntington City

Commissioner Curtis stated that alternatives for different areas, as a prospective location site for a County Fairground, would be submitted at public hearing.

(7)

LEON MILDRUM

Leon Mildrum, Water and Power Resources Services, presented the proposition of covering the drain ditch on Fourth West Street at Huntington. Mr. Mildrum stated that he proposed concrete pipe with gravel cover to accommodate surface water run-off. INTEROFFICE MEMORANDUM

The following Interoffice Memorandum, relating to an emergency freeze on all purchases for the balance of the year 1980 in all county departments, was approved by motion of Commissioner Parker, seconded by Commissioner Ware and approved by all members present.

EMERY COUNTY
INTEROFFICE MEMORANDUM

To: ALL DEPARTMENTS AND ORGANIZATIONS
From: Emery County Commissioners
Date: December 17, 1980
Re: Revenue Shortfall for 1980

As you have been previously notified, the revenue for Emery County for 1981 has not measured up to early expectations. We have been forced to reduce our revenue to coincide with actual cash receipts. Certain areas of emergency cutbacks have been previously adopted. However, they didn't reduce expenditures as much as is now necessary.

Due to the above mentioned reasons, the County Commission is enacting, effective December 17, 1980, an emergency freeze on all purchases for the balance of 1980. Any purchases which are to be made after this date (emergency fuel, etc.) must have prior approval of the Commission. Any overtime which can be eliminated should be. As always, use overtime work on an emergency basis only.

Secondly, we are bringing all issuance of warrants to a close so that we can determine actual expenditures made prior to the end of the year. All claims for previous purchases must be in the Auditor's office by noon of December 23, 1980 if they are to be considered for payment in the 1980 budget.

Finally, we as a Board of Commissioners want each and every person who works to help Emery County accomplish these goals to know that we appreciate your contribution and do not enjoy imposing these types of restrictions on your departments. We hope that you can appreciate the overall responsibility we hold and can work with us in these difficult financial matters.

Thank you for your help and Merry Christmas to each and every one of you.

CONSULTING AGREEMENT

THIS AGREEMENT made this Fourth day of February, 1980, by and between Emery County, a body corporate and politic, hereinafter referred to as "County" and Johansen & Tuttle Engineering, Inc., consulting engineers, hereinafter referred to as "Engineers".

WITNESSETH:

WHEREAS, the County from time to time has need of consulting engineering services; and WHEREAS, the County desires such services to be performed for it on an ongoing basis by Engineers and be charged for such services in accordance with an established and prearranged method of calculating fees,

NOW, THEREFORE, in consideration of the mutual covenants, conditions and premises hereinafter contained, it is hereby agreed by and between the parties as follows:

1. EXCLUSIVE CONSULTATION: Engineers will perform all engineering services required by the County during the pendency of this Agreement.

2. CALCULATION OF FEES: Engineering fees on County projects shall be calculated as follows, according to the estimated cost of construction of each project as determined in advance by Engineers:

A. General and small construction projects with costs up to \$100,000: All services shall be performed at an hourly rate established for each particular type of service, which rate shall be reviewed and adjusted annually by the parties and adopted by them on or before October 1 of each year to be applicable during the following calendar year. The rates and charges shall be as set forth in Schedule A attached hereto and made a part of this Agreement.

B. General construction projects with costs between \$100,000 to \$500,000 with the exception of all road projects: For all services through opening of bids on a given project, the engineering fee for the design phase shall be 6 per cent of the estimated construction cost as determined by Engineers. Said fee shall be paid upon submittal of monthly vouchers. For all engineering services on a given project thereafter, for the performance time of the contract, (including inspection, construction layout and construction administration) the engineering fee shall be an additional 8 per cent of the construction costs of the project as per the construction contract, provided however, that the total fee paid for both construction and design phases shall not exceed 14 per cent of the cost of the project as per the original construction contract, plus the cost of approved change orders at the same percentage rate. In the event that the contract performance time is exceeded, the additional engineering services will be charged in accordance with Schedule A.

C. Road construction projects with costs over \$100,000 and General Construction projects with costs over \$500,000: Engineers shall prepare and submit a detailed proposal and estimate of engineering fees for each such project and phase thereof, and be paid accordingly. Engineers shall prepare and submit proposals when such proposals are required to obtain Federal or State funding, irrespective of construction costs. The cost of preparation shall be paid in accordance with paragraph 3, below.

D. Additional Terms: This Agreement does not cover all foreseeable terms with respect to projects undertaken by the parties. Additional terms, consistent herewith, shall be negotiated on a case by case basis.

3. DETERMINING CATEGORY OF PROJECTS: Prior to commencement of any project, Engineers will, after consultation with County Officials involved, prepare a preliminary estimate of the total construction cost of the project (as well as the estimated commencement and completion dates) which shall be used for purposes of determining the billing method to be used from the preceding section. The costs of such preliminary estimate shall be paid at an hourly rate as set forth in Schedule A, in the event the project is not undertaken by the County. In the event the project is undertaken by the County, Engineers shall be paid for such preliminary services by the payment specified in paragraph #2.

4. TERMINATION: This Agreement may be terminated at any time upon 60 days written notice by either party, provided, however, that in the event of termination Engineers shall continue to perform services on any project as to which they at that time are working for which they shall be paid by the County in accordance herewith:

TERM OF CONTRACT: This agreement shall commence January 1, 1981, or as otherwise provided by the laws of the State of Utah, and shall continue in full force and effect until terminated as provided hereinafter, but shall not exceed a term of fifty (50) years.

PURPOSE AND STATUTORY AUTHORITY: This agreement is for the purpose of establishing a multi-county cooperative effort in acquiring, developing, and implementing computerized data processing systems for the contracting parties; and is authorized by the Interlocal Cooperation Act, Section 11-13-1, et seq., Utah Code Annotated, 1953, as amended, and Sections 17-4-3 and 17-5-50, Utah Code Annotated, 1953, as amended.

GENERAL PROVISIONS

ORGANIZATION: There is hereby created a joint Board which shall act in behalf of the contracting parties to administer the provisions of this agreement. The Board shall be known as the MULTI-COUNTY COMPUTER TRUST, hereinafter referred to as Trust. The Trust shall be composed of one (1) member from each of the contracting counties, who shall be designated and appointed by the respective County Commissions. Said appointment of Board members shall be submitted to the Trust in writing by each County Commission and shall have effect until such appointment is revoked, or a new Board member is appointed. Each County Commission may also designate in writing other persons to act as its Board member when the initial appointee is unable to act.

OFFICERS: The Trust shall select from its members a Chairman, a Vice-chairman, a Secretary and a Treasurer. The Secretary and Treasurer may be the same person.

(a) Tenure. The officers of the Trust shall be elected by the Board members at its first regular meeting and annually thereafter.

(b) Vacancies. A vacancy in office resulting from death, resignation, removal from the Board by his County Commission, or any other cause, shall be filled by the Board for the unexpired portion of the term of the person previously in office.

(c) Chairman. The Chairman shall be the executive officer of the Trust and subject to the control of the Board, and shall exercise general supervision over the affairs of the Trust. The Chairman shall, when present, preside over and conduct all meetings of the Board. If the Chairman is not present, then the Vice-chairman shall act in the capacity of Chairman. The Chairman, when authorized by the Board, may sign or execute contracts or other instruments for the Trust, when permitted by this agreement. The Chairman shall, in general, perform all duties incident to the office of Chairman and such other duties as may from time to time be prescribed by the Board.

(d) Vice-Chairman. In the absence of the Chairman, or in the event of his death, inability or refusal to act, the Vice-chairman shall perform all of the duties of Chairman. When so acting, he shall have all the powers of, and be subject to, all the restrictions upon the Chairman. The Vice-chairman shall perform such duties as may from time to time be assigned to him by the Chairman or by the Board.

(e) Secretary. The Secretary shall keep minutes of meetings of the Board, shall see that all notices are given in accordance with the provisions of this agreement, and, in general, shall perform all duties incident to the office of Secretary and such other duties as may from time to time be assigned to him by the Chairman or Board.

The Treasurer shall have the custody of, and shall receive and give receipts for money due and payable to the Trust, shall deposit all such money in the name of the Trust in such depositories as are selected by the Board, shall perform all accounting, financial record keeping, and similar services which may be necessary or desirable in connection with the Trust's affairs, and, in general, perform all duties as may from time to time be assigned to him by the Chairman or the Board. The Treasurer shall, at least semi-annually, provide to each member county a complete financial accounting of the Trust's activities for the preceding six (6) months and shall provide any or all Trust records to any party upon request.

MEETINGS: The first annual meeting of the Trust shall be held on the first Friday of February, 1981. Thereafter, annual meetings shall be held on the first Friday of February of each succeeding year. The time of the meeting shall be 10:00 a.m. The purpose of the annual meeting shall be the election of officers and the transaction of such other business as may come before the Board.

(a) Special Meetings. A special meeting of the Trust for any purpose or purposes may be called by the Chairman of the Board or by two (2) Board members at any time.

(b) Place of Meeting. The Board may designate any place within the member counties or such other convenient location to hold regular or special meetings.

(c) Notice. Written notice stating the place, day, and hour of the meeting, and in case of a special meeting, the purpose or purposes for which the meeting is called, shall be given to all members at least three (3) weekdays prior to the meeting date. A Board member who has not been given written notice but who is present at a special meeting of the Trust may waive the notice requirements of this section. Notice shall be deemed to have been properly furnished if mailed postage prepaid within the required time period to the county office of each Board member.

(d) Quorum. No business of the Trust shall be conducted without a quorum present. A quorum shall be one-half or more of the total Board members. Except as otherwise provided, consensus of a majority of a quorum of Board members shall be necessary to approve any action of the Trust permitted under the terms of this agreement.

(e) Conduct of Meetings. The Board may adopt such rules and regulations as are deemed necessary to ensure the orderly operation of its affairs not contrary to the provisions of this agreement.

AUTHORITY OF TRUST: The Trust, through its Board members as designated, shall have the power to do the following:

(1) Designate data processing systems that will be developed for member counties.

(2) Contract with private organizations or other entities to acquire, develop, and implement the designated data processing systems.

(3) Hold and expend monies allocated to or received by the Trust to accomplish the objectives stated herein.

(4) Sell to any other entity the system or software generated as a result of this agreement and retain the proceeds for its use, provided that said sale shall not deprive any member county of the benefit of such system or software. The Trust, however, shall not own any real or personal property, and any computer systems or software developed under this agreement shall be jointly owned by the member counties.

(5) Allow, by a majority vote of the Board members, other counties or entities to become a member of the Trust. Such entity must execute and agree to be bound by this agreement and shall pay into the Trust an amount of money as determined by a majority vote of the Board members, which amount shall only entitle said new member access to and use of the systems already developed by the Trust. The new member shall then be bound by this agreement and it shall contribute financially to any new systems which are created by the Trust as is required by the other members.

MANNER OF FINANCING:

(a) Contributions by Each Party. Initial contributions to the Trust by the individual contracting parties shall be as follows:

Carbon County, Emery County, Summit County, Tooele County, Wasatch County and Washington County shall each contribute the sum of \$13,850.00. Said amounts are represented by the computer systems previously developed by the Local Government Computer Trust and the monies still being held by said Trust. Said Counties agree and do hereby contribute said developed computer systems and monies being held by the Local Government Computer Trust to the Multi-County Computer Trust established by this agreement.

Sevier County, as its initial share, shall contribute \$13,850.00 in cash to the Multi-County Computer Trust.

(b) Yearly Budget. The Board shall, on or before the 1st day of October of each year, establish a proposed budget to finance its authorized objectives for the next calendar year. Said proposed budget shall then be transmitted to the governing body of each party to this agreement on or before October 15th of the same year. If the proposed budget is not objected to as hereinafter provided, it shall be deemed accepted by each member county.

Any governing body may, after receiving said proposed budget and within fifteen (15) calendar days of October 15th, file a written protest with the Trust concerning the proposed budget. The Trust shall then call a special meeting within ten (10) days of receipt of the protest, and shall also inform each governing body of the protest and the time and place of the special meeting. The governing body protesting the proposed budget may appear in person or by its designated agent or Trust member and shall, at the special meeting, set forth the reasons for the protest.

The Trust shall, within ten (10) days of said special meeting, meet and again establish a budget for the next calendar year. The Trust may consider the protest in its deliberations, but has the option to reset the budget as initially proposed. The budget shall forthwith be transmitted to each party to this agreement and each party shall then be bound to appropriate and distribute to the Trust an equal proportionate share of the amounts budgeted by the Board for the purposes of financing the Trust. Said amounts shall be distributed to the Trust on or before February 2nd of the year for which amounts are budgeted.

The Board may also establish projects and seek monies to finance said projects from the member counties at any other time. However, each county shall give prior authorization for said project and its expenditure of funds before the member counties are bound to participate in said project. If all counties agree to finance said project, their contribution shall be made within thirty (30) days of its approval. Each and every member county to this agreement must agree in writing to participate in said special project before the Trust may pursue development of the same.

TERMINATION: Any party to this agreement may withdraw itself from the Trust and the provisions of this agreement by giving ninety (90) days written notice to the other parties. A party desiring to withdraw from this agreement shall not be entitled to withdraw any monies already distributed by it to the Trust, but shall only be entitled to the benefit of those computer systems and software systems previously developed by the Trust and shall be entitled to the benefit of any systems that were developed after its withdrawal which were developed in part by the withdrawing party's monies. Any party withdrawing from this agreement shall not be entitled to sell to any person, firm, or municipality the computer systems or software acquired or developed as a result of this agreement unless all of the remaining parties agree to the same.

If all of the contracting parties agree to terminate this agreement, or if only two (2) parties remain and one of said parties gives its notice to withdraw, then all unencumbered monies being held by the Trust shall, within thirty (30) days, be distributed equally to each member who is then a party to this agreement. Any encumbered monies (i.e. monies held by the Trust which are subject to expenditure as a result of a binding agreement between the Trust and others) shall be held by the Trust until such time as they are expended, and each party shall then be entitled to the benefit of said expenditure. Said Trust shall be dissolved immediately after its monies are distributed and all of its agreements are fulfilled.

MODIFICATION: Any alterations, variations, modification or waivers of provisions of this agreement shall be valid only when they have been reduced to writing and duly signed by each party to this agreement.

INTERPRETATION: The captions which precede the various portions of this agreement are for convenience only and shall in no way affect the manner in which any provision hereof is construed. Whenever the context so requires, the singular shall include the plural and the plural shall include the singular, the whole shall include any part thereof, and any reference to gender shall include both male and female. The invalidity or unenforceability of any provision contained in this agreement shall not affect the validity or enforceability of the remainder hereof.

AGREEMENT WITH ELMO TOWN

Scott Johansen presented the Commissioners with a proposed Law Enforcement Agreement between Emery County and Elmo Town. Mr. Johansen reviewed the agreement, and explained some of the clauses that are contained therein. Reference was made to the fact that Elmo Town was referred to as Elmo City in said agreement; also Emery County was referred to as a municipal corporation instead of a body corporate and politic. Mr. Johansen stated that the change of these items would not be mandatory. The agreement was approved upon motion by Commissioner Ware, seconded by Commissioner Parker, and approved by all present. Said Law Enforcement Agreement is as follows:

AGREEMENT

THIS AGREEMENT made and entered into pursuant to Section 11-13-1 of the Utah Code Annotated, 1953, as amended, commonly referred to as the Interlocal Cooperation Act by and between EMERY COUNTY, a municipal corporation of the State of Utah, hereinafter referred to as County, and ELMO CITY, a municipal corporation of the State of Utah, hereinafter referred to as City.

WITNESSETH

THAT WHEREAS, the City desires to enter into this contract with the County, for the Emery County Sheriff's Department to provide police services for the incorporated areas of Elmo City, and

WHEREAS, the said City Council and the County Board of Commissioners have met to determine the feasibility of providing such service, wherein it has been determined that police service and protection are needed within the incorporated areas of Elmo City, and it is believed by the respective County Commission and City Council that it is mutually advantageous to each party to enter into this Agreement, and

WHEREAS, it is anticipated that the services provided will be compensated by the City as hereinafter set forth and as the respective Boards have determined and agreed.

NOW THEREFORE, in consideration of the premises and compliance with and pursuant to the terms and provisions of the Interlocal Cooperation Act as hereinabove set forth, the County and the City do hereby contract and agree with each other as follows:

1. The Emery County Sheriff's Department agrees to furnish police protection and to enforce State Laws and County and City Ordinances within the incorporated areas of Elmo City, Emery County.
2. The Emery County Sheriff's Department will furnish all equipment necessary including, but not limited to, such items as patrol cars, uniforms, badges, firearms, and other items of equipment necessary and incidental to modern police force.
3. Police service in the incorporated area of Elmo City shall be rendered under the direction of the Emery County Sheriff.
4. All salaries, costs of vehicles, equipment, and other direct expenses incident to and necessary in furnishing said protection and service shall be paid by the Emery County Sheriff's Department.
5. It is agreed that the Emery County Sheriff's Department will furnish all necessary police protection and service to enforce all state laws (and federal statutes as far as the same are applicable) which come within the knowledge and notice of the members of the Sheriff's Department and, in addition, will enforce both city and county rules and regulations, including, but not limited to, zoning laws, regulations of the Health Department, rules and regulations of the Building Inspector's Office, licensing and inspection regulations in connection with liquor licenses and under the Liquor Control Act of the State of Utah, dance halls and other licenses which come under the legal jurisdiction of the City and County, provided that no service shall be required of the Sheriff's Department for the enforcement of any said laws or regulations until and unless a warrant has been obtained from either the City or County Court of competent jurisdiction charging a violation of such regulations.
6. In addition, however, law enforcement officers will assist in communicating prior to a warrant such information, warnings and cautions as they deem advisable and necessary, and as requested by Elmo City Corporation which are reasonable and consistent with the office of the Sheriff.
7. Also, in addition, the law enforcement officers will assist Elmo City in other reasonable duties and functions as mutually agreed upon such as checking doors at night for security purposes and assisting other agencies within Elmo City as a cooperative effort, and such as animal control officer, building inspector, health inspector, and answering to reasonable citizen requests and complaints relating to law enforcement.
8. That for the services agreed to be provided herein, the City agrees to pay to the County for such services the sum of one one-hundredth of the assessed evaluation of the City of Elmo each year as compensation for the services. For example: If the assessed evaluation of Elmo were One Million Dollars, the sum to be paid to the County for the services rendered would be Ten Thousand Dollars.
9. The term of this Agreement shall be for a period of Twenty (20) years from the date hereof, but shall not be in excess of FIFTY (50) YEARS. This Agreement may be terminated by either party upon the condition that said termination be given by providing THIRTY (30) DAYS written notice to the other party. The provisions of this Agreement shall not be altered amended, or modified, except in writing signed by the duly authorized agents of the County and the City.
10. It is hereby agreed that title and ownership to all equipment and supplies, such as the patrol car, radio, firearms, uniforms, and all other equipment directly related to law enforcement, to be provided by the County at its expense within the terms of this Agreement, shall remain with the County during the term of this Agreement and after its termination.

Response was made in request for road improvement work in Cottonwood Canyon. A hard surface material was presented and recommended for the road in question. The County Commission stated that the county should not be expected to exert a greater effort in the improvement of Cottonwood Canyon Road, than to any other mine road in the county. In their opinion, in the past Cottonwood Road had received its fair share, agreement was received to the statement. It was the county's intention to continue in maintenance as in the past. Suggestion was given that speed limit road signs be installed on said road. It was stated certain companies using Cottonwood Road were not complying with the required County Ordinances. Non compliance with the County Ordinances was making negotiation difficult.

A motion was made to adjourn the meeting at 4:15 p.m. by Commissioner Ware, seconded by Commissioner Curtis.

(3) No person in the Grantee's service area shall be arbitrarily refused service, but in recognition of the capital costs involved in unusual circumstances, including, without limitation, instances when the distance from distribution cable to connection of service to subscribers is more than 400 meters (1,320 cable feet) or when a subscriber density exists less than the density specified hereinabove, service may be made available on the basis of costs of materials, labor and easements, in order to prevent inequitable burdens on cable subscribers in more densely populated areas.

(4) For all residential structures in the franchise area hereinafter erected which are to be served by underground utilities, the developer of the subdivision or development may acquire CATV service for this development under the following conditions, but otherwise the Grantee shall not be obligated to construct CATV system in such new development, except according to paragraph VII (2) above: Developer shall perform all trenching and backfilling necessary for the provision of cable television service, including furnishing of any imported backfill material required, and will furnish and install for the Grantee any necessary distribution conduit and substructures, including pedestals, required in accordance with the Grantee's plans and specifications. Developer may enter into a written agreement with the Grantee whereby such costs may be reimbursed to the developer by Grantee at a rate agreed upon by the parties.

In addition to providing plans and specifications to the developer, the Grantee shall inspect the facilities required hereunder, and certify to the Grantor prior to final approval of the subdivision or development that the facilities required herein are properly installed. The Grantor shall have the right to review and require its approval of the maps and specifications provided by the Grantee. Facilities installed hereunder shall be owned, operated, and maintained by Grantee.

(5) Grantee shall have twelve (12) months from the date hereof to complete hookup and to have the head end fully operational for the first subscribers. In the event this time limit is not met, this franchise shall automatically terminate without further action of the Commission.

Section VIII. OPERATIONAL STANDARDS; FORCE MAJEURE.

(1) The Grantee shall operate and maintain its cable television system in full compliance with the standards set forth by the Federal Communications Commission.

COUNTY RECREATIONAL CENTER

The delegation in the preceding minute entry had interest also in the designation of the Ferron City Park as a County Fair Grounds. Commissioner Parker presented the following comparison of potential County Fair sites on projector and screen:

Commissioners Minutes
October 20, 1981

EMERY COUNTY
COMPARISION OF POTENTIAL COUNTY FAIR SITES

Site Location	Present Value of Improvements on the Site	Cost of Future Developments to make site usable	Present Usability of the Site	Alternate uses of the Site	Other Considerations
Castle Dale 80 acres of BLM land north of the High School	\$0.00	There are no present improvements on the property and the cost would be substantial to make the site ready for use.	The site is not usable in its present condition.	If the site were developed along the fair board guidelines the site improvements would tend to receive less use through out the year.	The site offers the best opportunity to build and layout the site for the best possible use. It also provides enough ground for growth and such things as moto-racing and carnivals. The site does not have any utilities and would need a special system to pump water to the site.
Huntington 30 acres on present rodeo grounds and adjacent cattle mans assoc. prop.	Under \$75,000	The site would need additional grandstand construction, rodeo area development, new restroom facilities (which the city is presently developing), construction of stables and fencing.	The site is usable for riding club type activities, horse racing and other related activities. The site needs substantial upgrading to sponsor successfully the related activities of a county fair.	A developed site could be used for picnic and other recreation and because of its location would tend to be used more than just for the county fair activities.	The site is close to other facilities that would lend themselves to a county fair such as the local Jr. High and the Emery County Recreational Complex. The traffic pattern is such that we could attract attendance from outside the county. There is sufficient ground for parking and other facilities.
Ferron 10 acres on present city rodeo grounds	\$722,000 (as appraised by county appraiser)	The site could be improved by the purchase of additional property for parking and other uses. \$100,000.	The site without further development is usable to continue to sponsor the county fair; for picnic grounds; stockshow; and recreational purposes such as baseball.	The site is already being used extensively throughout the year for a wide range of activities other than county fair.	The parking is somewhat limited and the site has a little difficulty in handling large crowds. The site has successfully handled the last two county rodeos and horse races.

Commissioner Parker stated that a County Fair Grounds should be supported as a project to receive continuous use instead of but once a year as a County Fair Grounds. Lavon Day, Chairman of the County Fair Board was present and requested to respond in the interests of the County Fair. Mr. Day stated that a permanent location for the County Fair was desirable, but was not necessary as the functions of the County Fair had been conducted success- fully in the past in various locations. He stated that the purpose of the County Fair was to encourage participation in the development of talents, arts, produce, and abilities of the county residents together with the implementation of recreation and enjoyment for the public.

Suggestion was made by Commissioner Curtis that concentration should be made on the development of a Recreational Complex at Ferron City Park, rather that a County Fair Grounds.

Max Ralphps, Mayor of Ferron City, stated that Ferron City was agreeable to deed the Ferron Park together with present developments, accommodations, water rights, and culinary water service to Emery County, provided that Emery County will continue to maintain and develop the park, with the reservation that when the county no longer has use for the park, it should be deeded back to Ferron City. It was requested that a written Agreement be prepared for the parties involved. A motion was made by Commissioner Curtis that Commissioner Parker proceed with the preparation of the legal aspects

of the matter together with budget arrangements, etc. The motion was seconded by Commissioner Ware and approved by all members present.

(8)

DAN HUNTER

The following items were presented by Dan Hunter:

(a) The Sunedco Coal Company of Lakewood, California has set up a meeting in the Ferron City Hall building for October 22, 1981. Said meeting has interests relating to coal development. Dan Hunter was assigned to attend the meeting.

(b) Petitions of annexation of certain county property by Ferron City and Huntington City were presented. The Ferron petition is set for public hearing on Tuesday, November 10, 1981. The Huntington petition is set for public hearing on October 28, 1981. Both petitions will be given to Attorney, Scott Johansen for his legal opinion.

(c) A Resolution drafted by the A.L.G. for adoption by the Utah Energy Conservation Counsel in support of severance tax on Natural Resources was presented for consideration. Support for said Resolution was given upon motion of Commissioner Parker. The motion was seconded by Commissioner Curtis and approved by all members present.

Commissioners Minutes

October 20, 1981

A RESOLUTION SUPPORTING A
NATURAL RESOURCE SEVERANCE TAX

WHEREAS, those areas producing natural resources in Utah can be generally characterized as dependent, for their economic livelihood on the production of natural resources in their area; and

WHEREAS, when those natural resources are either economically or physically depleted, those communities dependent for their economic livelihood on that natural resource production activity will be severely impacted unless appropriate remedial measures are taken; and

WHEREAS, communities situated in areas of expanding natural resource production are impacted in a range of areas in addition to the more evident and commonly cited road, water and sewer service areas; and

WHEREAS, local officials are constrained in effectively coping with those impacts having measurable negative impacts on the quality of life in the aforementioned communities due to inadequate funds; and

WHEREAS, grant and loan funds from the community impact account and other grant and loan sources are both severely limited and directed toward the visible, highly publicized impacts on water and sewer, while little to no funding is available to mitigate the less evident, long term impacts such as planning, law enforcement, social services, administration, service demands by new residents that far exceed the demands of the indigenous population, etc.; and,

WHEREAS, local officials are in a position to manage funds under their jurisdiction in a timely manner and in a manner most appropriate to the needs of their communities.

NOW, THEREFORE, be it resolved that the Utah Energy Conservation and Development Council does hereby support the concept of a reasonable local option severance tax as a legitimate component to state legislation imposing a new or increased severance tax on the extraction of non-renewable natural resources.

The local option severance tax, as referenced in this resolution, is conceived to be a percentage tax, made available to local government by statute, enabling that local government to raise revenues for the purpose of mitigating those impacts that are attendant to natural resource production but for which grant or loan funds may be either unavailable or in short supply.

(9)

BEAR CANYON CAMPGROUND

Commissioner Parker expressed his feeling relating to the fee schedule at Little Bear Canyon Campground, stating that he felt that said fee schedule should be revised. It was agreed that Commissioner Parker would draw up a new schedule for the use of said campground for the Commissioners approval.

Mr. Leamaster stated to the Commission his reasons for requesting that the low bids made by other competitors be disregarded. Mr. Leamaster presented the following explanation for eliminating the purchase of the Fiat Allis Dozer and front-end loader.

DOZER

1. Foreign Fiat Allis made motor.
 2. Possibility of Fiat Allis plant in U.S.A. being closed, (Not Wall Street Journal article.)
 3. Lighter dozer, 4,750 lbs. against 5,649 lbs.
 4. Ripper depth, Fiat 27.4" against 48"
 5. Problem of metric bolts.
 6. Availability of parts. (Wheeler's Machinery having a greater capability.)
 7. Proven quality of Cat equipment. The present D6C having been used 10 years with only replacement of alternator and rebuilding of rollers which was done in 1982.
- International Crawler was disqualified because of insufficient weight.

LOADER

1. Weight difference, Fiat Allis FR20 42,500 against JD 844 51,820.
2. Horse power too low, did not meet specs, Fiat 215 H.P. against 260 H.P.
3. Bucket and lift arms too light, rated 4.5 cubic yards.
4. Tires did not meet specs of 4 rating.

After due consideration and reviewing Mr. Leamaster's concerns, the Commission accepted the Highway Departments recommendation that the most economically priced equipment which met the specifications outlined by Emery County, were those suggested by Mr. Leamaster.

(b) Mr. Hunter has received a letter from the Bureau of Land Management regarding the application of UP&L for construction of a coal haul road from the Deseret Coal Mine to the Wilberg Coal Mine haul road. The BLM was requesting that if Emery County has any comments or questions about the road, that these comments be given to them prior to April 19, 1982. - 2) The Commissioners are concerned about the infringement upon grazing rights of permittees.

Mrs. Fox received information that the County would be transferred to a reimbursement schedule of .013 x wages and payment would be made quarterly. Job Service said that they were doing this upon direction from the County Attorney. The Commission desired that the payment schedule be left as it is, ie: reimbursement for funds spent. The County Attorney was elected to notify Job Service, done by motion of Commissioner Ware, seconded by Commissioner Curtis and approved by all members present.

(4)
BUREAU OF LAND MANAGEMENT

Sam Rowley, San Rafael Management District of the Bureau of Land Management, and Gene Nodine, Kenneth Rhea, Martha Hahn, and Jim Kenna came to the Board to inform them of the progress being made with regard to the wilderness study phase of proposed wilderness areas in Emery County. Martha Hahn presented several maps to illustrate the status of the wilderness inventory and to show the areas presently being studied to determine if they qualify as a wilderness area. The BLM first prepares a site specific analysis, and then the environmental impact statement is made. The group informed the Commission that they would provide the Commissioners with a schedule of when they will be at the specific sites located in Emery County, and that they would be willing to have groups go with them to see what their studies would consist of. They will also make information that they receive from the public and from special interest groups; available to the Commission for their review.

Sam Rowley told the Commission about the coal sale that was held in February. There was only one tract of land sold, and no bids were received on the other tracts. The tracts that were not sold will not be brought back for sale until December, 1982. There is another sale on May 25, 1982 for the North Horn Tract and Rilda Canyon Tract.

(5)
PAIUTE INDIAN TRIBE

The following named persons appeared for a discussion regarding the proposed acquisition of land by the Paiute Indian Tribe in eastern Sevier County. One of the proposed tracts of land that may become Paiute Indian Reservation is presently being used by the Emery Stock Growers Association for grazing. J. Elmer Collings, Sevier County Commissioner; T. Merlin Ashman, Sevier County Commissioner; Paul Brown; Carvel V. Magelby, Six County Commissioners Associations; Dewey Jensen Emery Stock Growers Association; Earl Jensen, Emery Stock Growers Association; Lloyd Jensen, Emery Stock Growers Association; Dermis Jensen, Emery Stock Growers Association; Wayne STaley, Emery Stock Growers Association; Paul S. Truesdell, Bureau of Indian Affairs; Dee C. Wilcox, Bureau of Indian Affairs; Bill Blosser, CHZM Hill; Mary Ellen Sloan, Paiute Indian Tribe; Travis N. Benioh, Chairman Paiute Indian Tribe; Martha G. Hahn, Bureau of Land Management; Jim Kenna, Bureau of Land Management; Sam Rowley, Bureau of Land Management; Gene Nodine, Bureau of Land Management; Kenneth V. Rhea, Bureau of Land Management; John Niebergall, Forest Service; Reed C. Christensen, Forest Service; and Bruce G. Parry, Utah Division - Indian Affairs.

Travis Benioh of the Paiute Indian Tribe informed the Commission that the Paiute Indian Tribe was terminated from federal recognition in 1954, and therefore lost all federal assistance. On April 3, 1980 through the efforts of Senator Orin Hatch and Congressman Dan Marriott, five (5) bands of the Paiute Indians became recognized by the government. Upon being recognized, they had to do the following things; 1) elect an interim Tribal Council, 2) develop a constitution, 3) bring the enrollment up-to-date there are presently 503 members, and 4) file with the Secretary of the Interior a proposal to develop a tribal reservation. The tribe and the Bureau of Indian Affairs have worked together to come up with the reservation plan. In this plan there are seven (7) parcels of land proposed, and one of these areas is near Emery Town, in eastern Sevier County. The Commission informed the representatives of the Indian Tribe that they are not opposed to the acquisition of land, but they

are concerned about how the development of the land in Parcel #7 would impact Emery County, and how the use of the Forest Service land would affect those presently using the land for grazing.

Members of the Stock Growers Association expressed their concern about losing their grazing permits, that the land would be closed off so that they wouldn't be able to get their cattle to higher ground, and they were concerned about the work that they have already done to improve the land and they would receive nothing for it. Reed Christensen of the U.S. Forest Service informed the Commission that funds that were planned for use in upgrading the water development in this area were going to be used elsewhere because of the proposed acquisition of the land by the Indian Tribe.

Farrell Chapel of the Six County Commissioners Organization read a letter that had been drafted and sent to the congressional delegation. The letter is as follows:

Mar. 16, 1982

After a lengthy and in-depth study of the draft proposed Paiute Indian Tribe of Utah Reservation plan, the executive board of the Six County Commissioners Organization has passed a resolution opposing the proposed plan. The resolution passed by a unanimous vote.

While we are extremely sympathetic to the plight of our Paiute neighbors, it is our feeling that this proposal, if adopted would not in the long run provide the desired outcome. Therefore, the Commissioners oppose this proposal on the following grounds;

(1) That the entire proposal is based on the concept of the tribe receiving a parcel of land from which to derive revenue without their having to invest any of their time, talent or personal resources. We would contend that this is the basic philosophy that has contributed to the tribe's present condition, which is to depend almost entirely on government subsidized programs for its existence. As the proposal indicates, this would be the intended use of parcel 7 in Eastern Sevier County, which contains coal deposits that would be leased to obtain sources of revenue to supplement present government grants.

(2) That the granting of lands to the tribes which are currently leased, allocated, etc. to our mining and livestock industries is unfair and discriminatory. We are especially concerned about the rights or our constitution on parcel 7, eastern Sevier County, parcel 6, Fish Lake and Parcel 2, Cove Fort.

(3) That the establishment of these parcels as Indian Reservations with the corresponding change in jurisdictions could further effect the rights of present users of this land by restricting or denying access, effecting water sheds and water rights and otherwise fragmenting areas presently open to our grazing and mining industries.

For the reasons stated above, this organization goes on record as opposing this proposal and urgently requests your assistance in modifying it so that the government's commitment to the Paiute tribe does not take away rights previously granted to other citizens. We suggest this might be accomplished by purchasing for the tribe from the private sector if necessary, usable land which they can work and gain revenue from while regaining some pride and dignity through self-sufficiency.

We will appreciate your assistance in this very sensitive matter.

Sincerely,
Carvel V. Magleby Executive Director

CVM:jh

Mr. Hunter and Commissioner Ware had heretofore met with members of the Bureau of Indian Affairs to try to come up with some viable alternative or solution to the problem. The following five items were discussed as solutions, 1) That the Indian Tribe have a contract only to receive the royalty payments for the extraction of the coal resources identified as reservation lands. 2) That the Indian Tribe receives a coal land deed only to the area encompassed by the reservation request. They do not get the royalties but would lease the federal property. 3) That a long term service management agreement which redelegates all management responsibilities and control back to the forest service and BLM by execution of the Piute Tribe, BIA, and respective land management agencies herein referred. 4) That 99 year renewable guarantee of grazing rights be issued by the Paiute Tribe to the affected stock growers prior to stock growers consenting to the sale of lands.

5) (Least desirable option) The management of lands shift to management of tribe as per documentation submitted with the agreed stipulation to conditions which have been proposed by and approved by the cattlemen's association membership.

Discussion of this matter was terminated due to pending matters on the agenda.

(d) Requisition No. 28 for purchase of computer tables for the County Recorder's Office was approved by motion of Commissioner Curtis, seconded by Commissioner Ware and approved by all members present.

(9)

COUNTY VOTING PRECINCTS

Because of an increase in the population of Emery County, there is a need to divide the Ferron and Castle Dale voting precincts. Recommendation was received from the Emery County Clerk, Glen P. Bott regarding the division of these two precincts. Mr. Bott also recommended that the registered voters north of the congressional District boundary extending down Huntington Canyon to the north boundary of Huntington City be combined with the Cleveland voting precinct. Motion was made by Commissioner Curtis that the recommendation of the County Clerk be followed and that Ferron City be divided into two voting precincts with the division line being main street; that Castle Dale City be divided into two voting precincts with the division line being Center Street; and that Huntington be re-divided along the Congressional District line as mandated by law and those on the north of the boundary line be combined with the Cleveland precinct. The motion was seconded by Commissioner Parker, and received unanimous approval by those members present.

Fred Wetzels, Project Engineer, was present to answer any questions that the Commission may have. Because of the rising water table, they are concerned about problems they will have in placing the pipe in the ground, so they are requesting that they be allowed to bury some of the pipe before the conditional use permit is granted. Commissioner Ware asked Mr. Wetzels if all of the construction work would be done between the fence line and the road. The Commission was informed that UP&L has obtained permission from most of the property owners in the area to place the equipment on the property, and UP&L will reimburse for any damage done.

DAN HUNTER

(a) Stan Nielsen, of Ferron, has requested that the Commissioners ride in the Peach Days Parade in Ferron. The Commission requested that the Administrative Assistant, Dan Hunter, find out of the date of the parade and inform them at the next meeting of Commissioners.

(b) Mr. Hunter presented an agreement between the Utah Department of Transportation and Western Coal Carriers for use of "triple trailers" on Highway U-57 and CR5-05, the Wilberg Coal Haul Road. The Board of Commissioners discussed the continued use of triple trailer rigs and have instructed that the following Emery County Policy be communicated to the Department of Transportation.

(1) The Commission express concern regarding the fencing of right-of-ways along this highway in order to prevent injury to livestock and wildlife.

(2) The Commission further expressed concern over the number of loads being hauled on the County maintained road that were over limit. These overload conditions are aggravated by the use of the triple trailer rigs, causing law enforcement officers additional difficulties in policing the safety and nondestructive use of the highway.

(3) Emery County is concerned about present highway conditions and maintenance funds available. The County feels that the use of triple trailers would increase the amount of maintenance required on the Wilberg Coal Haul road. The Commission requested a desire to have the State of Utah obtain ownership and maintenance responsibility for that portion of the Wilberg Coal Haul road presently under Emery County's jurisdiction.

(c)

KAY KIMBALL

Kay Kimball, Certified Public Accountant, presented his audit of the Emery County funds for the year 1981. Mr. Kimball reviewed his findings of said financial audit in his letter, pointing at certain weaknesses in the County operation. He also gave his general commendation of the County's financial condition.

May 27, 1982

Emery County Commissioners Emery County
Castle Dale, Utah

Gentlemen:

I have completed my audit engagement of Emery County for the year ended December 31, 1981, and have issued my report thereon, dated May 27, 1982. As a part of my examination, I reviewed and tested the county's system of internal accounting control to the extent I considered necessary to evaluate the system as required by generally accepted auditing standards. Under these standards the purpose of such evaluation is to establish a basis for reliance thereon, in determining the nature, timing, and extent of other auditing procedures that are necessary for expressing an opinion on the financial statements.

The objective of internal accounting control is to provide reasonable, but no absolute, assurance as to the safeguarding of assets against loss from unauthorized use or disposition, and the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that the cost of the system of internal accounting control should not exceed the benefits derived and also recognizes that the evaluation of these factors necessary requires estimates and judgments by officials.

There are inherent limitations that should be recognized in considering the potential effectiveness

of any system of internal accounting control. In the performance of most control procedures, errors can result from misunderstanding of instructions, mistakes of judgment, carelessness, or other personal factors. Control procedures whose effectiveness depends upon segregation of duties can be circumvented by collusion. Similarly, control procedures can be circumvented intentionally by officials with respect either to the execution and recording transactions, or with respect to the estimates and judgments required in the preparation of financial statements. Further, projection of any evaluation of internal account control to future periods is subjected to the risk that the procedures may become inadequate because of changes in conditions and that the degree of compliance with the procedures may deteriorate.

My study and evaluation of the county's system of internal accounting control for the year ended December 31, 1981, which was made for the purpose set forth above, would not necessarily disclose all weaknesses in the system. In addition, I recognize that some weaknesses which may have existed during that period have already received corrective action. Such weaknesses as were revealed through my examination are discussed below for your action as deemed necessary.

Receipts

During the course of my audit, I noted that receipts were not being written for all monies received in some departments. There should be a written receipt for all monies collected and a permanent record maintained in each department. Receipts should be deposited with the treasurer on a daily basis or as often as necessary.

Account Reconciliations

During my examination I noted that some bank accounts and account reconciliations were not being made on a timely basis.

I recommend that the treasurer balance the cash balances with the auditor's records on a monthly basis. Cash should be identified by Fund Balance. In addition, the treasurer should balance the "Collectors" account each month by balancing account balances to cash in banks.

Court Trust Funds

My examination also revealed that the District and Circuit Court Trust Funds were not being properly balanced. At December 31, 1981, bank balances were not reconciled and balanced to Trust Accounts.

I recommend that bank statements be reconciled monthly and balanced to ledger accounts showing to whom the money is owed.

Computer Records

The county has recently automated its accounting system on a Four-Phase Computer. The upgrading of the county's accounting system should increase efficiency and improve the ability to furnish accounting information on a timely basis.

However, I recommend that all departments proof all computer print-outs for accuracy when received and compare with information submitted to Data Processing. In addition, some additional records may need to be kept in the various departments until the computer programs are proven to be capable of providing the required information.

Internal Auditing

During my audit I noted that additional internal auditing would improve the county's internal control. The auditor's office should schedule each department for periodical accounting review. All departments should make all records available to the auditor's office and implement suggestions made by the auditor which would improve their accounting procedures.

Minutes of Commission Meetings

I noted during my examination that detailed written records, both in the minutes and otherwise, did not always substantiate what was approved in Commission meetings. A careful review of the Commission minutes should be made to insure all decisions have proper follow-up and that the procedures followed are well documented.

Fixed Assets

During the audit I noted that the fixed asset ledgers were being updated and automated on the computer.

I recommend that the auditor's office make periodic reviews of all departments to insure that the fixed assets are being accounting for properly.

Claims

My examination revealed that claims for library expenditures were not being approved by the County Commission.

I recommend that all claims be approved by the County Commissioners.

I would like to take this opportunity to thank the elected officials and other county employees for the cooperation and assistance given to me during the course of my examination.

Respectfully submitted,
/s/ Kay Kimball

SAM ROWLEY

Sam Rowley and Mervin Miles of the Bureau of Land Management stated that the dumping of household refuse on public lands was becoming a serious problem. Mr. Rowley made request for support from the County in the area of law enforcement. Said law enforcement would be helpful in giving relief to the dumping problem. Commissioner Curtis suggested that consideration be given for a law enforcement agreement with Emery County similar to the one presently in effect between Emery County and the U.S. Forest Service. Further action on the matter was left with the Bureau of Land Management.

BRAD PETERSON

Brad Petersen and Paul Taylor, Youth Corrections Officers employed by the State of Utah, discussed the concerns of housing juveniles, and suggested that Carbon and Emery Counties who are sharing the service of the Carbon County Detention Center, consider a joint project to construct a detention center for use which would be operated by the State of Utah.

He explained that certain County funds would need to be channeled into this facility, and that certain State funds would be used for the operation of the facility.

The County Commission recommended that Sheriff Lamar Guymon, along with Mr. Petersen and the Carbon County Sheriff, review this program, and that Sheriff Guymon bring back specific recommendations for a course of action to the Emery County Commission.

At 2:40 P.M., Commissioner Ware made a motion that the meeting be adjourned. The motion was seconded by Commissioner Curtis and approved by all members present.

(d) Mill Levy The County Attorney has been told verbally that the Tax Commission intends to require the County to increase the uniform school mill levy by 1.81 mills under Section 59-9-2 of the Utah Code. However, no official notice has been received by the Auditor. It was the County Attorney's opinion that such a request from the Tax Commission was not timely and in order to be timely would have had to have been given to the County before the mill levy was set prior to June 15, 1982. Apparently only two counties will receive such orders even though over twenty counties are below 16 per cent assessed value, and to assess an additional mill levy for fewer than all of those who are under 16 per cent would be discriminatory. In view of the fact that over 90 percent of the additional mill levy would fall upon State assessed taxpayers, who supposedly as assessed at 20 percent of assessed value, and also because a complete reappraisal is already underway and also because the Tax Commission contends only that locally assessed unimproved real property is low whereas improved property is at 15.69 percent and due to the lateness the request of the Tax Commission (tax notices are due to be mailed July 21st) the commission concluded that it was too late to put the additional mill levy on the 1982 tax notices.

(e) Milt Beck, Claims Administrator The matter of a letter dated June 18, 1982 from Milt Beck, a Claims Administrator with Robert J. DeBry & Associates, Attorneys, came before the Commission. The letter had been submitted to the County Attorney for review. It was his opinion that the Commission could not review the claim because it was not properly presented. It was his recommendation that a response be made to the letter that it was not considered. A motion was made by Commissioner Parker, seconded by Commissioner Curtis, that Dan Hunter made the suggested response, the motion was approved by all members present.

At 12:20 o'clock A.M. motion to adjourn was made by Commissioner Parker. The motion was seconded by Commissioner Curtis.

Michael D. Herkimer of the Southeastern Utah Health District presented a copy of a letter that he had sent to Clawson City stating that the Health District was concerned about the number of connections on the water line. Bruce Funk, a member of the water board in Clawson, was present at the meeting and stated that the water board is aware of the letter, and would be discussing a solution. (6)

JOE MARINONI AND GALE GRANGE

Mr. Marinoni asked the Commission to explain why the Zoning Resolution had been enforced with respect to his gravel pit, but not being enforced with respect to others. The Commission asked the County Attorney whether he was aware of the circumstances. Mr. Johansen responded that during the approval process of the Sinbad application, it began to appear that perhaps the Resolution was too cumbersome for certain types of gravel pits, and should be amended. The County staff attempted to minimize the burdens placed on Sinbad by the resolution, by utilizing such things as real property performance guaranties, which are normally not allowed in these situations. Also during this time, Mr. Marinoni and his partner, Gale Grange, reported in approximately July of 1982 that other gravel pits were operating without approval. Upon investigation it was apparent that some for the pits which had been reported had claim as nonconforming uses and, therefore, would not be subject to the Resolution. For those who might of have claim as nonconforming uses, the enforcement of the Resolution was been lax because an amendment is in process. Mr. Johansen also stated that his opinion was that the County had not taken any action or lack of action which had cost Sinbad substantially, and that any loss to Sinbad was not the County's fault

but rather was because Sinbad had not actively pursued the approval. Conditional approval, which binds the county and is really the last substantial step which requires lengthy county consideration, was granted September 17, 1980, but Sinbad did not satisfy the conditions set forth, which were minimal, until August 20, 1982. Rodney Despain, Don Almond, Gale Grange, Joe Marinoni, and the Commissioners discussed these matters at length. NO action was proposed or taken.

(7)

Discussion was made with regard to the ambulance garage. The present agreement states that the County will have use of the ambulance garage. However, if Dr. Kotrady needs the space for expansion, he is to replace the garage with a like facility at his expense. The County will be able to use the garage for a total of three years, and after which time the building will be forfeited to the doctor with no further obligation on his part.

Upon discussion, the County Attorney was instructed to rewrite the agreement to state that Dr. Kotrady could move the County out at any time, but he is to replace the building with a like facility at a site acceptable to the County. If the sit chosen is on County property, Dr. Kotrady will not be required to pay the ground used for the building site.

Commissioner Parker made a motion that Resolution 12-16-82B, accepting the offer of \$2,500,000 purchase price, plus \$15,000 rent minus the \$5,000 credit option towards purchase price to purchase the medical center, conditioned upon the fact that the signed documents are not to be delivered until payment is made. In preparing the budget forms to go to the State Auditor's Office, Karen Truman, County Auditor, discovered that the anticipated revenue presented at the budget hearing held December 9, 1982 needs to be adjusted.

She found that \$377,000.00 of Class "B" surplus should have been designated as General Fund surplus and recommended that the Commission go on record as approving this change.

This change would not increase or decrease the total budget, but merely reclassify two of the expenditure budgets by decreasing the Class "B" Road budgeted expenditures by \$377,00.00 and increase the Highway Department budgeted expenditures by \$377,000.00.

The State Auditor's Office was contacted concerning the change and the State Auditor's Office indicated that the change would be appropriate.

(16)
MILLER CREEK WATER

Commissioner Clyde Conover moved that the Commissioner take no action on the petition, hereto attached, to extend the boundaries on the Miller Creek Water Special Service District into Emery County on the following grounds:

1. Farmers Home Administration has indicated in its letter dated February 18, 1983 that FHA insists that the water systems must be designed for growth and that a 6-inch line is required.

2. Petitioners who attended Commissioner's meeting on February 2, 1983 indicated all that is wanted is water service for the 11 existing homes and the County Engineer indicated 2-inch and 4-inch lines are adequate for the purpose.

3. Growth in the Miller Creek area is contrary to the best interests of Emery County because of:

a. The difficulty and expense to the County of providing police, fire and ambulance services to a totally rural area on the county's boundary line when growth just over the line into Carbon County would be much easier serviced from the Price area.

b. The cost to the County of snow removal and maintenance to outlying County roads in the area, plus the cost of construction of new roads as additional homes are constructed.

c. The cost of school bus service to the area, only 80 per cent of which is reimbursed by the State.

d. The new area may well compete with Emery County's cities for impact funds.

e. Encouraging growth in the area will strain other utilities to provide their services to such a remote area.

f. The County has had no chance to plan for growth in the subject area. Zoning requirements and building inspection staff may be inadequate to assure orderly growth.

4. Alternative solutions for getting water service to the 11 existing homes are welcome and will be favorably considered by the Commission.

Motion was seconded by Commissioner Bevan Wilson and passed unanimously.

(15)

MILLER CREEK SUBDIVISION

Miller Creek Water Special Service District: At 10:45 p.m. the Miller Creek Water Special Service District annexation and the resolution from Carbon County dated April 25, 1983 was opened for discussion. No one from Miller Creek was

in attendance though they had been notified of the meeting. No one from Zions First National Bank was in attendance though the Bank had furnished the Commission with an unsigned copy of the Carbon County Resolution and a copy of the proposed Emery County proceedings. The following items were discussed:

- 1.The difficulty and expense to the County of providing police, fire and ambulance services to a totally rural area on the County's boundary line when growth just over the line into Carbon County would be much more easily serviced by the Price area.

- 2.The cost to the County of snow removal and maintenance to outlying County roads in the area, plus the cost of construction of new roads as additional homes are constructed.

3. The cost of school bus service to the area, only 80 percent of which is reimbursed by the State.

4. The new area may well compete with Emery County's cities for community impact funds.

5. Encouraging growth in the area will strain other utilities to provide their services to such a remote area.

6. The County has not planned for growth in the subject area. Zoning requirements and building inspection staff may be inadequate to assure orderly growth.

7. There was provided to the Commission no certified copy of the Carbon County Annexation Resolution as required by law.

8. Since the new resolution and proposed proceedings were provided to the County only yesterday, the property described has not been checked by the County Engineer.

It was the consensus that culinary water service to the eleven existing homes, which is the stated objective of the annexation, was a worthwhile goal and is favored by the Commission if it can be done without risking the above problems. If the property description of the proposed annexation could be reduced to include only the road and the eleven residential lots, and if the water line size could be reduced to 2-inch lines, or possibly one 2-inch line and one 4-inch line, and if an interlocal governmental agreement could be drawn between Emery County and Miller Creek limiting the project to the eleven existing homes, and if any property owner involved would be willing to convey development rights to Emery County, then perhaps the County would be adequately protected. Due to the fact that Carbon County has scheduled a hearing for May 24, 1983 and such entities as Miller Creek, Price River Water Improvement District, Carbon County, and Farmers Home Association all must approve any changes, it was felt impossible to grant conditional approval now because the conditions could not be accomplished and approved by all of the entities before the next commission meeting.

The Commission expressed a desire to have Miller Creek accept responsibility for proposing solutions rather than expecting Emery County to do so. It was unanimous that water service to the eleven existing home was a worthwhile objective.

After much discussion, it was moved by Commissioner Conover and seconded by Commissioner Wilson that the Carbon County resolution dated April 25, 1983 be rejected pursuant to Section 11-23-6(1) of the Utah Code. Motion passed unanimously.

(16)

DISASTER EMERGENCY DECLARATION

Commissioner Clyde Conover made the motion that the Board of Emery County Commissioners ratify the action of April 15, 1983 designating Emery County as a local emergency disaster as the result of the land slide in Spanish Fork Canyon of April 15, 1983, wherein severe economic conditions exist as a result of the railroad and highways being severed, which is the primary connection to the Wasatch Front and western portions of the state. The motion was seconded by Commissioner Bevan Wilson and approved by all members present.

This bond now includes \$300,000 for needed improvements at the Ferron Sewer Lagoon. By motion of Commissioner Clyde Conover the Emery County Board of Commissioners gave their approval authorizing the sale and proceed with the Notice of Sale. (19)
COMMISSION MEETING CHANGE

Motion was made by Commissioner Bevan Wilson that the Emery County Board of Commissioners adopt a starting time of 10:00 a.m. on their morning meetings rather than the 8:00 a.m. as originally scheduled. (The evening meeting would remain the same.) This would allow each Commissioner time to gather and review his business items before presentation at the meeting. Larry Davis, Editor of the Emery County Progress, expressed his concern that any meeting as a group of Commissioners could restrict the flow of information to the public wherein policies may be adopted prior to the regular meeting and that the official meeting would only ratify decisions made previously, if such business takes place these meeting would be in violation of the Utah Open and Public Meetings Act. The Commission assured Mr. Davis this was not their intention. The motion was seconded by Commissioner Clyde Conover and approved by all members present.

(20)
U.A.C. COMMITTEE

By letter the Utah Association of Counties asked for a recommendation to fill the vacancy left by the previous Commissioner, John Parker. Motion was made by Commissioner Bevan Wilson that the Emery County Board of Commissioners recommend Clyde Conover to fill the vacancy and that Commission Chairman Rue P. Ware notify them immediately, seconded by Commission Chairman Rue P. Ware and approved by all members present.

(21)
GREEN RIVER CLINIC

Blaine Silliman, Howard Silliman and Coda Reynolds met with the Emery County Board of Commissioners to discuss their need in keeping the Green River Clinic open. Commissioner Clyde Conover had invited Jeffrey Johnson of the State Office of Rural Health Services and Gary Williams of Southeastern Association of Governments to be in attendance. The most urgent need of the clinic is financial support. Mr. Johnson outlined some possible short term and long term means of possible financial assistance.

(a) SHORT TERM - Government Jobs Bill - to provide health care to area of high unemployment through health services. \$5,000 to \$10,000 possibly by June 1, 1983.

Department of Health maternal and child health funds, \$5,000 to \$10,000.

(b) LONG TERM - Federal Community Health Service Grant wherein the clinic applies for 75% of funds needed to operate. Would require securing of local and state funds up to 24% prior to submitting federal application.

It was the consensus of those present that the local governing board agree to incorporate as a group to apply for funds, so that immediate action may be taken to secure short term assistance through Mr. Johnson and Mr. Williams.

Mr. Peck represented by attorney Joane White, indicated that he had completed all parts of the contract with the exception of the cutting of the grass. Commissioner Clyde Conover indicated that the grass was unacceptable and questioned if any grass could grow in that type of soil. After much discussion, motion was made by Commission Clyde Conover that both sides suspend further legal action for 7 days and to refer this matter to legal counsel and for engineering recommendation, seconded by Commissioner Bevan Wilson and approved by all members present.

(30)

8. Since the new resolution and proposed proceedings were provided to the County only yesterday, the property described has not been checked by the County Engineer.

It was the consensus that culinary water service to the eleven existing homes, which is the stated objective of the annexation, was a worthwhile goal and is favored by the Commission if it can be done without risking the above problems. If the property description of the proposed annexation could be reduced to include only the road and the eleven residential lots, and if the water line size could be reduced to 2-inch lines, or possibly one 2-inch line and one 4-inch line, and if an interlocal governmental agreement could be drawn between Emery County and Miller Creek limiting the project to the eleven existing homes, and if any property owner involved would be willing to convey development rights to Emery County, then perhaps the County would be adequately protected. Due to the fact that Carbon County has scheduled a hearing for May 24, 1983 and such entities as Miller Creek, Price River Water Improvement District, Carbon County, and Farmers Home Association all must approve any changes, it was felt impossible to grant conditional approval now because the conditions could not be accomplished and approved by all of the entities before the next commission meeting.

The Commission expressed a desire to have Miller Creek accept responsibility for proposing solutions rather than expecting Emery County to do so. It was unanimous that water service to the eleven existing home was a worthwhile objective.

After much discussion, it was moved by Commissioner Conover and seconded by Commissioner Wilson that the Carbon County resolution dated April 25, 1983 be rejected pursuant to Section 11-23-6(1) of the Utah Code. Motion passed unanimously.

(The evening meeting would remain the same.) This would allow each Commissioner time to gather and review his business items before presentation at the meeting. Larry Davis, Editor of the Emery County Progress, expressed his concern that any meeting as a group of Commissioners could restrict the flow of information to the public wherein policies may be adopted prior to the regular meeting and that the official meeting would only ratify decisions made previously, if such business takes place these meeting would be in violation of the Utah Open and Public Meetings Act. The Commission assured Mr. Davis this was not their intention. The motion was seconded by Commissioner Clyde Conover and approved by all members present.

(b) LONG TERM - Federal Community Health Service Grant wherein the clinic applies for 75% of funds needed to operate. Would require securing of local and state funds up to 24% prior to submitting federal application.

EMERY COUNTY NURSING HOME

Mr. Ray Killpack, Administrator, Mr. Lund Leonard, Board Chairman and Mary Ann Pugmire, Director of Nurses, all representing the Emery County Nursing Home and Mr. Tedd Stagg, CPA Accountant, met with the Emery County Board of Commissioners. Mr. Stagg discussed the effect of rising hospital costs and the effect on the Emery County Nursing Home. The nursing home had a net operating loss in 1982 of \$26,363. Present 1-day costs for providing care for 1983: skilled patients, \$42.72; intermediate patient \$36.87. Under the present schedule the nursing home charges \$41.80 for skilled patients and \$33.53 for intermediate patients with a net loss for each as follows: skilled .92 cents each day, intermediate \$3.34 each day. Projected 1983 costs with inflation are expected to be \$46.00 for skilled patients and \$40.00 for intermediate patients, each day. It was recognized that increasing the rates would put an increased burden on those private pay patients who make up about 25% of the patients.

Solutions offered were:

1. Raise the rates to 1983 projected costs and private pay patients pay that actual cost.
2. Raise the rates as projected with Emery County subsidizing private pay patients. Under such a program, Emery County would participate in the amount of \$24,419.

Ray Killpack indicated that in 1983 the nursing home would be operating with a large deficit and would have serious cash flow problems unless financial assistance could be obtained from the County.

27

After considerable discussion, motion was made by Commissioner Clyde Conover to raise the rate for skilled patients to \$46.00 per day and intermediate patients to \$40.00 per day, seconded by Commissioner Bevan Wilson and approved by all members present. It was the Commission's recommendation that the nursing home borrow any money to operate until such time as the Commission can give consideration to the issue later.
